

The California Department of Forestry and Fire Protection (CAL FIRE) anticipates ordering a new Fire Apparatus Engineer (FAE) certification list on October 24, 2011. This certification list may be used up to a year from the date the list is ordered.

Please make sure that your profile on the State Personnel Board's website is up to date and reflects the tenure/timebase and location(s) that you are willing to work.

Any updates must be made no later than October 23, 2011, to be reflected on the certification list. Once the certification list is ordered **no changes** will be made to the certification list. Any changes made after the certification list is ordered will be processed in your profile but will not be reflected until a new certification list for FAE is ordered.
