\*Shaded rows represent fires for which fire reports have been submitted to the CDF Emergency Activity Reporting System (EARS). Actual splits in jurisdiction may not be reported at this time. This large fire list includes fires 300 acres and greater to which CDF responded. The source of this data is gathered from reports filled by CDF Units statewide. The information is verified when a final fire report is submitted by the CDF unit where the fire occurred. Often this final report does not come in until after a fire season ends when staff have time to finalize the paperwork. Other agencies are not obligated to provide reports to CDF on fire activity within their jurisdiction. Information on this list concerning other agencies should be verified with those agencies.

Total statistics are not final, and may not match any other fire statistics being produced by CDF at this time
