The Butte Lightning Complex currently consists of 29 fires divided into geographical branches to allow for coordination, management, and accountability of resources. The current Branches are listed below and only fires that currently pose the highest potential threat are identified by name. The fires are evaluated daily to determine risk potential. Evacuations and Road Closures are listed on page two.

Concow Branch:

- **Rim Fire** – 330 acres, actively burning in the area of Rim Road and Hwy. 70. Fire continues to threaten the community of Concow. Dozers are working to tie in lines in conjunction with fuel breaks.
- **Empire Fire** – 1,000 acres, actively burning north of Hog Ranch Road at the northern end of the Concow Reservoir threatening the community of Concow.

Stirling Branch:

- **West Fire** – 600 acres, fire is burning on the east side of the West Branch of the Feather River drainage. Dozers are cutting line across the ridge top to prevent fire from crossing to the west side.
- **Break Neck** – 150 acres, burning in an area north and east of Stirling City.
- **Camp** – 2500 acres, located due to infrared flight mapping data and located on the north side of Hwy. 70 near the Plumas National Forest Boundary.

Hwy 32 Branch:

- **Smokey** – 240 acres, burning west of Hwy 32 in Tehama County South of Soda Springs.
- **Little Smokey** - 50 acres, burning west of Hwy 32 in Tehama County east of Cold Spring.

South Fork Branch:

- **Frey Fire** – 1500 acres, burning north of La Porte Road near Jackson Ranch with rough, steep terrain. Does not pose an immediate threat to populated areas and is expected to burn between 3,000-5,000 acres.

Additional:

INCIDENT SPECIFIC:

A fire was confirmed on the North side of HWY 70 near Elephant Ridge and has been named the Camp Fire. The current acreage has been estimated at 2500 acres.

Weather changes will have a direct impact on the fire behavior of these fires over the next several days. Citizens in or near the affected areas should maintain a heightened state of awareness as this fire complex is still actively burning.

Officials are encouraging residents to monitor the fire situation in and around their area via the local media. If conditions change, fire and law enforcement officials will make immediate notification to keep the public informed.

GENERAL:

As a result of the large number of significant fires throughout California, firefighting resources are limited and priorities for resources allocation are being continually re-evaluated based on incident threat to life and property. A significant amount of resources have arrived at the Butte Lightning Complex during the last 24 hours and more are expected over the next few days.

Additionally, fire officials are asking that as July 4th approaches citizens exercise extra caution to prevent new fires.
