WILDFIRE ACTIVITY STATISTICS

FOREWORD

The California Public Resources Code directs the State Board of Forestry to designate state and privately-owned forest, watershed, and rangeland as "State Responsibility Area." The department's fire protection mission is to protect natural resources on those lands from damage by wildfire. Land not designated as State Responsibility Area is the protection responsibility of federal or local agencies.

The Department of Forestry and Fire Protection provides direct protection for most State Responsibility Area. The remainder is protected by several agencies and counties under contract with the state. The Department of Forestry and Fire Protection also contracts to provide wildland fire protection on certain federal lands, and also provides contracted life and property protection for numerous local governments.

This annual report is primarily a statistical record of fires and damages on State Responsibility Area, and on other areas which the Department of Forestry and Fire Protection protects under contract.

The Emergency Activity Reporting System became effective July 1, 1989. Fire data is entered into the computer at the fire station level, then forwarded via modem and phone lines to Sacramento Headquarters for storage in the state database.

DIRECT PROTECTION AREA (DPA)

That area of the state, which by law or pursuant to an agreement, is provided wildland fire protection.

FEDERAL DPA

Areas in which the Federal Government provides wildland fire protection.

FEDERAL RESPONSIBILITY AREA (FRA)

Areas in which the financial responsibility of preventing and suppressing fires is primarily the responsibility of the Federal Government.

LOCAL DPA

Areas in which a local government entity provides wildland fire protection.

LOCAL RESPONSIBILITY AREA (LRA)

Areas in which the financial responsibility of preventing and suppressing fires is primarily the responsibility of local government.

STATE DPA

Areas in which the California Department of Forestry and Fire Protection provides wildland fire protection.

1999 FIRE SEASON SUMMARY

The 1999 fire season saw over 285,000 acres of wildland burned, a 200% increase over 1998. This was the fifth highest total since 1945. Northern California experienced intense lightning storms during mid-August, when over 26,000 lightning strikes hit the state with little accompanying rainfall. Several hundred lightning-caused wildfires resulted with many becoming large damaging fires. Northern California experienced a severe north wind event in mid-October that caused several fires to rapidly consume thousands of acres of wildland. Peak fire season was extended in the Coast and Cascade Areas from two to four weeks longer than normal and budgeted fire season was ended 6 days early in the Sierra Area. Lack of fall rains also caused fire season to be extended in Riverside, San Bernardino and San Diego Units, with several large fires burning in the units during the holiday season.

The top five fires in acreage burned in CDF direct protection area:
