Subject: CDFW comment on FCAT, California Forest Carbon Plan (Draft)
Attachments: Luysaert et al 2008_Old Growth Forests as Carbon Sinks.pdf; Harmon_Franklin_1990_Carbon storage.pdf; Krankina, Olga M. and Mark E. Harmon. 2006.pdf

To whom it may concern,

Please consider bolstering chapter 6.3, Forest Carbon Storage Dynamics, with, for example, findings and conclusions in the attached papers reporting on carbon storage in old growth forests vs. young forests:

Harmon, M.E., W.K. Ferrell and J. F. Franklin, Effects of Carbon Storage of Conversion of Old-Growth Forests to Young Forests, 1990;

Krankina, O. N. and M. Harmon, 2006, Forest Management Strategies for Carbon Storage;

Luysaert, S. et al., 2008, Old-growth forests as global carbon sinks.

Thank you, and please contact me for any questions,

Jon Hendrix
