Subject: Forest Carbon Plan document FYI

In light of Trump & Co.'s penchant for purposefully ignoring the science, policy and economics of climate change, it might be a good idea to eliminate the word(s) climate (change) from the title and contents of the Forest Carbon Plan document. Perhaps a substitution such as the word, health. Thus - Forest Health Plan. Doing such an alteration sooner rather than later, since Trump placed land management agencies under a gag order the other day.
