INTRODUCTION TO THE CALIFORNIA FOREST IMPROVEMENT PROGRAM

PURPOSE

The California Forest Improvement Program (CFIP) is a forestry incentive program that provides funds to forest landowners for management plans, RPF supervision, site preparation, tree planting, thinning, pruning, follow-up, release, land conservation, and improvement of fish and wildlife habitat. CFIP's purpose is to encourage private and public investments in forestlands and resources within the state to ensure adequate future high quality timber supplies, related employment and other economic benefits, and to protect, maintain, and enhance the forest resource for the benefit of present and future generations.

FUNDING

The source of funds for CFIP projects historically has come from California's Forest Resource Improvement Fund (FRIF). FRIF receives its funding from timber sale revenue off of the State's Demonstration Forests. Funding may also be provided from other State and Federal sources, e.g. Forest Stewardship Program and Forest Land Enhancement Program of the USDA Forest Service.

FEDERAL COST-SHARING PROGRAMS¹

Your contract may be funded in part by various USDA Forest Service programs such as the Forest Stewardship Program (FSP) or the Forest Health Management Program (FHMP) when such funds are available. The State receives these funds through grants that may expire in shorter time frames than the normal CFIP contract. It may be necessary to accomplish certain activities within the USDA grant period. The use of federal funds will be done on a contract by contract basis and will be discussed with the CAL FIRE Project Manager before approval of the contract. In general, only those activities that can be accomplished during the grant period are funded with USDA funds. Ask your CAL FIRE forester for more information.

NOTE: Usually federal funding sources may have other requirements; e.g. that the property's forestland be covered by the **California Cooperative Management Plan**.

¹ Those practices funded by the USDA Forest Service State and Private Forestry must be completed within the grant period of 18 months. However, if practices are not completed within that time period were due to conditions beyond the landowner's control, the State Forester may grant an extension for time, not to exceed 12 months, IF the federal grant can also be extended.

THE GUIDEBOOK

This guidebook is designed to explain the program and application procedures for foresters, forestry consultants, and forestland owners. Contact your local CAL FIRE forester (refer to Table of Contents for Forest Advisor/Forestry Assistance Specialist list) Registered Professional Forester (RPF), or the Forest Stewardship Helpline at 1-800-738-TREE for assistance with the CFIP application process.

CAL FIRE forester

For purposes of this guide, the terms CAL FIRE forester, CAL FIRE Forestry Assistance Specialist (FAS) and Project Manager are used interchangeably.

THE PROGRAM

The CFIP can provide eligible landowners with technical and financial assistance for planning, reforestation and resource management investments that improve the quality and value of forestland. Under current State law, CFIP can help with rebuilding forest, soil, water, fish and wildlife resources to meet our future needs for a healthy environment and productive forest and woodlands.

- CFIP may grant up to 75 percent of the cost of your project. (90% cost share rates are available on lands substantially damaged by fire, insects and disease within ten years prior to the execution of a contract; 90% cost share rates are available for all Cooperative Forest Management Plans for agreements signed from November 1, 2011 to April 30, 2014 or until special funds expire).
- The CFIP program is non-regulatory and participation is voluntary. There is a 10-year requirement for maintenance of funded work.
- Landowners decide who to hire, and may do some of the work themselves.

ELIGIBLE LANDOWNERS

To be eligible for CFIP, landowners must own at least 20 acres of forestland but not more than 5,000 acres of forestland in California. Landowners that own less than 20 acres may qualify if they submit a joint application with neighboring landowners and the combined acreage is a minimum of 20 acres of forestland.

FORESTLAND DEFINED

"Forestland" means the land:

1. Can support 10 percent or more tree cover with trees native to California, including native oaks. Generally but not always this is Site V (Dunning) and better timberland.
2. Is zoned to allow forest resource management practices.

ELIGIBLE LAND

The intent of this law is to ensure that investments in timber stand improvement funded by CFIP will yield future marketable forest products and/or improved natural resources. Land must be zoned for uses compatible with forest resource management. Land in Agricultural Preserve (Williamson Act) or Timberland Production Zone (TPZ) qualifies. Properties with conservation easements or zoned for residential and/or commercial development may be eligible, if the easements or zoning place no restriction on forest management practices. If land is not zoned for timber production, the owner must maintain funded practices for at least ten years. A notice to this effect will be filed with the County Recorder. If the land is sold this provision is binding on the new owner or the CFIP grant must be paid back with interest.

ELIGIBLE ACREAGE

1. Timber-related practices must cover five acres or more.
2. There is no minimum acreage limit for land conservation or habitat improvement projects

QUALIFYING PROJECTS

Projects proposed where timber has been harvested pursuant to the Z'berg-Nejedly Forest Practice Act of 1973 (Act) may qualify for CFIP financing if:

1. All conditions imposed by the Act have already been satisfied (i.e., logging is complete and the area has been restocked and certified by a Report of Satisfactory Stocking).
2. CFIP practices are not part of the minimal requirements of the Act and will not be used to meet those requirements.

Resource management work that is required subsequent to harvesting under the Act is not eligible for CFIP funding.

THE APPLICATION/CONTRACT PROCESS

1. Contact your local CAL FIRE forester to determine if your property and project are eligible for funding. The CAL FIRE forester can advise you of the availability of funds in your area. Generally CFIP application requests exceed the funds available and applications are prioritized, using ranking criteria specified in the CFIP regulations. Replanting forestland that has burned generally are the first to be funded (when funds are available for this activity), but most eligible projects can eventually be funded given adequate lead-time.
2. Fill out Application found on page 13 herein.
3. Include a project description (see explanation and guide on Page 6 and 46).
4. Include an accurate project map with a clear legend, legal description and north arrow.
5. If your application is approved, CAL FIRE will provide a formal contract (called California Forest Improvement Program Agreement). By signing the contract, landowners agree to perform the project as proposed in return for CFIP financial assistance.

NOTE: Work on any practice where reimbursement is expected under a CFIP agreement, including designing a management plan, cannot be started until a fully executed and signed copy of the agreement is received from CAL FIRE.

BEGINNING THE PROJECT (after receiving a signed agreement)

1. Hire or contract with a Registered Professional Forester (RPF) or other resource professional as required.
2. Complete and submit to CAL FIRE the Environmental Checklist along with all requirements pertaining to the Checklist such as Tribe notification, archaeological surveys, CAL FIRE Archaeologist consultation, and biological surveys completed prior to beginning on-the-ground work (an RPF is recommended for this step).
3. Complete and submit to CAL FIRE for approval the required ownership wide Management Plan (see pages 43-46).
4. **Do not begin any on-ground practices until you have been notified by your CAL FIRE Forester (Project Manager) that all conditions in 2 and 3 above have been satisfied.**
5. Execute the project according to the terms of the contract. Any changes require official contract amendments. Project modifications could result in adverse environmental impacts and resulting liability problems.

COST-SHARE CAP RATES (see Page 12)

Cost-share cap rates are established for Program consistency as well as to encourage landowners to develop cost-effective projects. Several practices have multiple allowable rates. (**Rates requested must be justified in the application**). If the cost of a project practice exceeds the listed maximum rate, the landowner must pay the difference. Allowable costs for erosion control or habitat improvement practices will be evaluated for cost-effectiveness based on rates allowed in the Environmental Quality Incentives Program (EQIP) of the Natural Conservation Resources Service.

PAYMENT RECORDS AND INVOICE

NOTE: This is a reimbursement program. In order to receive reimbursement, documents must show that expenses to be reimbursed have been paid out.

Keep records of all cash expenses, as well as contributions in personal labor and materials. When the project is complete, submit the CFIP Invoice form and copies of all your expense records to the CAL FIRE Forester. For larger projects, interim invoices can be submitted when at least 5 acres of a practice/project has been completed. The State will reimburse by check. Payment generally takes two months from receipt of the invoice in Sacramento.

APPEALS

If a project is not approved by the CAL FIRE Forester, landowners may ask the Director of the Department of Forestry and Fire Protection to reconsider the decision. To make an appeal write the Director at the address below within 10 days of being notified that the application was rejected and state the reasons why a review is in order.

Director, CFIP Appeal
California Department of Forestry and Fire Protection
P.O. Box 944246
Sacramento, California 94244-2460

A review will be conducted, and the landowner will be notified of the decision within 30 calendar days of receipt of the appeal.

REFERENCES

CFIP was created by the California Forest Improvement Act of 1978 under Sections 4790-4799.05 of the Public Resources Code (PRC). CAL FIRE has adopted official State guidelines for implementing the act under Articles 1-8, Chapter 9.5, Division 1.5, Title 14 of the California Code of Regulations (eff. 8/79). When there is a question about the program, the ultimate reference should be either from one of these two legal documents or from the California Forest Improvement Program (CFIP) Program Manager in Sacramento HQ at (916) 653-8286.

ELIGIBLE PRACTICES AND RATES

CFIP PRACTICES ELIGIBLE FOR COST-SHARING

A Project Description (see page 17) explains the forest improvement, fuels management, or conservation practices for which funding is requested and must be attached to the CFIP Application. It should provide enough detail to allow the landowner, RPF, CAL FIRE inspector, and any forestry workers hired to implement the project to have a clear understanding of where, when and how the CFIP project will be accomplished. The CFIP applicant should propose work that can be completed within the contract period. Applicants with large properties or projects may need to enter into sequential contracts to complete work in phases.

ELIGIBLE PRACTICES

- Management Plan – (RPFs developing plans for their own properties-see Item #4, page 46).
- RPF Supervision
- Site preparation
- Trees and planting
- Tree shelters
- Pre-commercial thinning
- Pruning
- Release
- Follow-up/slash disposal
- Land Conservation-Includes erosion control, road rehabilitation & wildlife/fisheries projects

A description of each practice follows, along with information about which cost share rate applies. Please see page 10 for a list of the practice cost share rates and cap amounts.

MANAGEMENT PLAN (see pages 43-46)

A long-term forest Management Plan must be prepared for applicant's total ownership including all non-forest acres. The intent of this requirement is to help the landowner develop personal land management objectives and feasible projects, based on a professional analysis of the property's potential and available opportunities. CFIP can fund preparation of a new plan, as well as revision of an existing plan, such as a Stewardship Incentives Program (SIP) or Non-industrial Timber Management Plan (NTMP).

The Management Plan must be prepared by a Registered Professional Forester (RPF). RPF's are licensed professionals who are familiar with all aspects of forest management, and have a working knowledge of applicable State and local regulations. (CAL FIRE foresters can provide a list of RPF consultants.)

The Management Plan shall include the objectives of the landowner and should be a flexible instrument that can be amended by the participant as landowner desires or other conditions change.

Management Plans shall be written using the California Cooperative Forest Management Plan Template.

The Management Plan shall be based primarily on the participant's objectives. The plan shall provide sufficient historical and resource baseline data to formulate alternatives for forest improvement. It must compare alternatives and provide a recommended course of action to optimize forest health.

Various alternatives shall be proposed involving analysis of factors such as economics, watershed improvement, wildlife habitat, fire suppression, natural and man-made impacts to the property and surrounding ownerships, and other concerns.

Each CFIP plan will be unique. Plans for large acreage ownerships are expected to contain more information than small ownerships because of greater diversity in soil types, vegetation, wildlife habitat and participant objectives.

See Page 43-46 for additional information on preparing a Management Plan.

RPF SUPERVISION

Supervision of your project by an RPF is another activity eligible for CFIP funding. Typical services provided by an RPF include completing required CFIP application and invoice paperwork, mapping and marking the areas where work will occur, and hiring and supervising the work crew. Landowners who are new to forestry work or the CFIP program are particularly encouraged to take advantage of the opportunity to work with an experienced professional to ensure that their project is implemented efficiently and cost effectively.

The higher RPF Supervision rate applies to the first five acres of work. Work on the remaining acres is eligible for the lower rate.

NOTE TO RPFs: RPFs are not eligible for reimbursement for supervising work performed on their own property. However, if another RPF is hired to do the work of supervision then reimbursement for that cost (not to exceed actual cost or cap rate) may be allowable

SITE PREPARATION

Site preparation is the removal of vegetation competing or potentially competing with planted trees. The distinction must be made that site preparation is used when trees are to be planted, either manually or naturally, after clearing activities. Methods include using heavy machinery such as bulldozers, cutting and removing vegetation with chainsaws, scalping the soil with hand tools, using prescribed fire to burn the site, and/or chemical treatments of the competing vegetation prior to planting. The low rate applies to level areas with light vegetation, such as scalping off grass in forest openings. The higher rates are appropriate for sites where site preparation will be more labor intensive, such as those with heavier or taller vegetation, or on steeper slopes.

TREES AND PLANTING

The purchase of tree seedlings or seeds, the costs of transporting and storage of seedlings, and the planting costs are all eligible. Acreage for tree planting, and associated site preparation, tree shelters, and follow-up work, is calculated on the basis of the average spacing; minimum requirements are usually 300 to 400 trees per acre. The low rate is appropriate for areas with moderate slopes and good access. The “moderate” rate may be suitable where planting sites are remote, on steep slopes or rough terrain. The “difficult” rate may be suitable when planting large stock (e.g. 2-0 seedlings or larger container seedlings) and/or inter-planting.

TREE SHELTERS

The cost of VEXAR® or tree shelters needed to protect seedlings from browse damage is eligible for funding.

TIMBER STAND IMPROVEMENT (TSI) /FUELS REDUCTION

Pre-commercial thinning, release and pruning practices qualify for cost-share assistance.

- **Pre-commercial thinning** means reducing the number of stems of small commercial tree species to a predetermined spacing to improve growth and/or to reduce fuel loads.
- **Release** involves removal of non-commercial tree species, shrubs/brush or grasses that are competing with previously planted or existing commercial tree species.

For Pre-commercial Thinning and Release, the lower rates apply on sites that are on gentle slopes with moderate stocking. The higher rates may be used for densely stocked and/or very steep sites.

- **Pruning** may be funded in conjunction with thinning or release. Rates increase based on the minimum number of trees pruned per acre. As measured from the uphill side of the tree from the level of the slash, the minimum height of pruning shall be 10 feet or ½ of the Live Crown Ratio (LCR) which ever is the lesser.

FOLLOW-UP/SLASH DISPOSAL

Follow-up is work necessary to promote the survival of seed or seedlings or for protection to or enhancement of other completed practices (e.g. fuels reduction). Follow-up must be undertaken within 36 months of completion of the original practice. Follow-up covers three types of project categories:

1. The first pertains to any work performed within 36 months of a planting project to promote the survival of the seedlings. In most cases, insect, disease, rodent, weed, or brush control work will qualify for funding. Application of fertilizer or shade cards also falls in this category.

2. The second category is Follow-up work undertaken as a continuation of a prior project. This category typically includes work, such as controlling re-growth from Thinning or Release practices that occur within five years of the original project.
3. The third category is slash disposal. This category can include mastication, chipping, or piling and burning of slash generated from Site Preparation, Thinning, Release, or Pruning practices.
4. Lopping and scattering of slash to a height less than 30 inches from the ground is the minimum requirement for slash disposal on CFIP projects. The cost of lopping and scattering slash are covered by the cap rates allowed for the CFIP practice that generated the slash and are not eligible for Follow-up funding.

On the Rate Sheet (see page 12) low rates apply to easier projects on level ground, or inexpensive practices such as re-scalping and chemical treatments. Higher rates apply to more difficult projects on steeper slopes, and to more labor-intensive and/or expensive practices, such as chipping or use of a masticator.

FORESTLAND CONSERVATION PRACTICES / FISH & WILDLIFE HABITAT IMPROVEMENT

Forestland conservation practices include erosion control projects, fuels reduction (for habitat protection from fire using timber stand improvement practices above), road repair, stabilization of abandoned roadbeds, and improvement of drainage facilities to reduce soil erosion and sedimentation of streams, as well as a variety of projects to improve habitat for fish or wildlife species.

Several kinds of off site erosion control projects may be eligible for cost-sharing. Many practices are directed toward the control of erosion from privately-owned rural roads. Road repair or closure projects funded by CFIP must provide a direct benefit to a fish-bearing stream. A line-item budget must be submitted to document anticipated costs of conservation practices. The CFIP program does not establish cap rates for conservation practices, but uses the rates of the Environmental Quality Incentives Program (EQIP) as a guide.

Examples of eligible practices include:

- Erosion control projects
- Forest road repair and upgrading *
- Stabilization of abandoned roadbeds*
- Improvement of drainage facilities to reduce soil erosion and sedimentation of streams
- Planting native oaks
- Building nest boxes or platforms
- Prescribed burning to improve habitat
- Fencing to protect sensitive wildlife habitat such as wet meadow sites, riparian areas and streams from livestock
- Planting streamside vegetation **
- Planting or reshaping eroding stream banks or gullies **

- Installing logs, rocks or other structures in streams to improve fish habitat **
- Design and installation of fords, rolling dips, or culvert crossings.*
- Replacement or repair of failed or undersized culverts.*
- Correction of road drainage problems, including rocking, out sloping, berm removal, waterbar installation, and ditch repair.*
- Reshaping, vegetating and mulching of cut banks, fills, and gullies.*
- Abandonment of eroding roads or skid trails that are no longer used.*
- Remedial work for stabilizing landslides (requires analysis and design by a Certified Engineering Geologist or Geotechnical Engineer).*
- Development of a road assessment plan identifying: *
 - Sources of erosion, including stream crossings and damaged or undersized culverts
 - Recommended repair projects
 - Prioritizing of projects, based on a cost/benefit analysis that identifies both the costs and the estimated reduction of sediment.

** Note: Funding of forest road repair and upgrading is only allowed if it protects, maintains, or enhances fish and wildlife habitat.*

*** Note: Projects involving work on stream channels or banks may require permits from the California Department of Fish and Game or other agencies.*

PRACTICES NOT ELIGIBLE FOR CFIP COST-SHARING PROGRAMS

- Work required for compliance with the Forest Practice Act and Rules.
- Construction of new roads or bridges.
- Fencing to protect stands from livestock.
- Planting of Christmas trees and greenery.
- Costs of land, water, irrigation, or purchase of tools or equipment.

2011 CFIP COST-SHARE CAP RATES

PRACTICE	CFIP CAP RATE	90% COST-SHARE ¹	75% COST SHARE
Cooperative Forest Management Plan	\$3500 + \$3.00/acre 1 st 160 acres \$2.50/acre each additional acre to 1000 acres	\$3150 + \$2.70/acre 1 st 160 acres \$2.25/acre each additional acre to 1000 acres	\$2625+ \$2.25/acre 1 st 160 acres \$1.88/acre each additional acre to 1000 acres
<i>Rates for Management Plans larger than 1000 acres are negotiated w/CAL FIRE forester</i>			
Mini Management Plan	\$1750 + \$1.40/acre	\$1575 + \$1.26/acre	\$1313 + \$1.05/acre
<i>Rates for revisions are to be negotiated with FAS based on complexity but no higher than mini plan rate</i>			
RPF Supervision	\$75/acre 1 st 5 acres \$40/acre each additional acre	\$68/acre 1 st 5 acres \$36/acre each additional acre	\$56/acre 1 st 5 acres \$30/acre each additional acre
Site Prep			
Light	\$220/acre	\$198/acre	\$165/acre
Moderate	\$300/acre	\$270/acre	\$225/acre
Heavy	\$400/acre	\$360/acre	\$300/acre
Trees & Planting			
Average	\$160/acre	\$144/acre	\$120/acre
Moderate	\$200/acre	\$180/acre	\$150/acre
Difficult	\$240/acre	\$216/acre	\$180/acre
Tree Shelters	\$260/acre	\$234/acre	\$195/acre
Pre-commercial Thinning²			
Light	\$200/acre	\$180/acre	\$150/acre
Moderate	\$300/acre	\$270/acre	\$225/acre
Heavy	\$400/acre	\$360/acre	\$300/acre
Pruning²	\$125 for 50 trees/acre (tpa) \$200 for 100 tpa \$275 for 150 tpa	\$112.50 for 50 tpa \$180 for 100 tpa \$247.50 for 150 tpa	\$93.75 for 50 tpa \$150 for 100 tpa \$206.25 for 150 tpa
Release²			
Light	\$200/acre	\$180/acre	\$150/acre
Moderate	\$300/acre	\$270/acre	\$225/acre
Heavy	\$400/acre	\$360/acre	\$300/acre
Follow-up/Slash Disposal²			
	\$200/acre	\$180/acre	\$150/acre
	\$350/acre	\$315/acre	\$262.50/acre
	\$600/acre	\$540/acre	\$450/acre
Land Conservation³	Cost based on problem. Use EQIP rates as a guide.		

¹ The 90% rate will cover all projects on land substantially damaged by wildfire, insects, diseases, wind, floods, landslides or earthquakes. 90% cost share rates are available for all Cooperative Forest Management Plans for agreements signed from November 1, 2011 to April 30, 2014 or until special funds expire).

² 14 CCR 1545.4 (a), "Slash that is created by the project shall be treated by chipping, piling and burning, burying, lopping or otherwise removing as recommended by the area Fire Control Officer." Either the FAS or Unit Fire Plan or Fire Prevention staff can act as the "Fire Control Officer". See page 8 "FOLLOW UP WORK"

³ Maximum allowable costs do not appear for land conservation or habitat improvement. In these categories activity is variable and will depend on site condition, acreage and/or type of project. However, costs will be evaluated based on rates used for EQIP.

CFIP APPLICATION

INSTRUCTIONS FOR PREPARING THE CFIP APPLICATION

The CFIP application will include an Application Form, a Project Summary, and a brief Project Description and a map of the proposed project. The Application is a questionnaire asking information necessary to determine eligibility and cost-share rates. The Project Summary, Project Description and map show what is proposed, how much funding is requested, and where the project is located. **The funding rate requested must be explained and justified in the Project Description. Failure to adequately describe the project could result in delays or denial of approval.**

CFIP applications may be submitted at any time. If funds for your project aren't available, the application will be kept on file by the local CAL FIRE Forestry Assistance Specialist. When funding is available you will be notified to prepare and send in any additional paperwork needed to complete the (Contract) Agreement Package.

FIELD INSPECTION

After the CAL FIRE forester receives your application, he or she will meet with you and your RPF to look at your project and get an overview of your property. Any needed modifications to your project and/or revisions to the application package will be discussed at this time. Once the project is approved and funding is available, you will be notified to prepare an Agreement package, see page 20. The Agreement package is forwarded to CAL FIRE Headquarters in Sacramento for final approval and processing.

COST-EFFECTIVE PROJECTS HAVE PRIORITY

CFIP has been designed to enhance forest resources, such as timber, water, soil, recreation, fish and wildlife on privately owned timberlands in California. It is critical that we select the most cost-effective projects. Funding requests often exceed the available funding.

Because federal cost share funds are limited, a landowner may wish to combine available federal and state assistance to fund different projects on the same parcel of land. To find out more about federal programs, contact your local CAL FIRE forester or the Natural Resource Conservation Service.

**CALIFORNIA FOREST IMPROVEMENT PROGRAM
APPLICATION**

CFIP Project Number: _____

1. Enter the name(s) of all landowners as they appear on the deed. (Use attachment if necessary).

Name: _____ Phone Number(s): _____
Day Evening

Address: _____
Street or P.O. Box City State Zip

Name: _____ Phone Number(s): _____
Day Evening

Address: _____
Street or P.O. Box City State Zip

Name: _____ Phone Number(s): _____
Day Evening

Address: _____
Street or P.O. Box City State Zip

2. Responsible person to be contacted:

Name: _____ Phone Number(s): _____
Day Evening

Address: _____
Street or P.O. Box City State Zip

- 3. (a) Does the landowner own 5,000 acres or less of forestland in California? Yes No
- (b) 20 acres or more of forestland? Yes No
- (c) Is the total area proposed for each ground practice 5 acres or more? Yes No N/A (Wildlife/Conservation)
- (d) Number of acres under the Management Plan: _____ Total ownership size: _____
- (e) Project area timber site productivity is: I II III IV V
- (f) Has the project area been damaged by natural causes within the last 10 years? Yes No

4. (a) How is the project area zoned? Check one of the following and answer pertinent questions:

TPZ Agriculture Preserve Other: _____

(b) Is there a Conservation Easement, CC&R's, or a petition for rezoning from TPZ to other uses, existing, underway, or contemplated, which would restrict resource management activities for the period of time during which the grant is administered (10 years)?
 Yes No

If yes, explain: _____

(c) List all land uses permitted under this zoning. Indicate existing land uses on Management Plan Map.

List specific use(s): _____

(d) Will the landowner agree not to put CFIP land to any use incompatible with forest resource management for 10 years?
 Yes No

CFIP APPLICATION

(this form available electronically)

5. Has any of the land proposed for CFIP funds been harvested subject to the 1973 Z'Berg-Nededly Forest Practice Act?
 Yes No If yes, please list THP, NTMP, SYP Number: _____
6. Is there a previously prepared Forest or Land Management Plan for the area proposed for CFIP project? Yes No
Should the plan be revised? Yes No
If yes, list the CFIP Project Number: _____
7. Are you an employee of the State of California? Yes No
Were you an employee of the State of California within the past 12 months? Yes No
8. Does your current employment or former employment within the last 12 months with the State of California in any way relate to or affect the awarding of California Forest Improvement Program (CFIP) grants or authorization of cost-share payments for work accomplished under a CFIP grant? Yes No

Please complete the **Application Project Summary**.

I certify that the above and attached is true and correct to the best of my knowledge.

Executed on _____ at _____

Applicant's Signature

NOTE

Other Application Requirements:

- **Complete the Application Project Summary** (see page 3).
- **The funding rate** requested must be explained and justified in the Project Description. Failure to adequately describe the project could result in delays or denial of approval.
- **Provide maps** (scale 15 min. /7.5 min.; USGS topographic maps are best) indicating areas to be treated.
- **Provide a detailed project description** which includes an explanation and justification for the cost-share rate requested.

CFIP PROJECT DESCRIPTION, SCHEDULE AND SUMMARY

INSTRUCTIONS FOR PREPARING THE CFIP PROJECT DESCRIPTION

A CFIP Project Description explains the forest improvement, fuels management, or conservation activity for which funding is requested. It should provide enough detail to allow the landowner, RPF, CAL FIRE inspector, and any forestry workers hired to implement the project to have a clear understanding of where, when and how the CFIP Project will be accomplished. **The funding rate requested must be explained and justified in the Project Description. Failure to adequately describe the project could result in delays or denial of approval.**

The CFIP applicant will propose work that can be completed within the contract period. Applicants with large properties or projects may enter into sequential contracts to complete additional work.

Due to contractual requirements, the following components are considered necessary for all project descriptions for CFIP.

1. Name and address of landowner. Name of Project Description author.
2. Legal description of site(s) including section, township, range, baseline and meridian, and county, the longitude and latitude and the CALWATER 2.2 watershed identifier must be included in the project description. For the watershed identifier go to: <http://frap.CALFIRE.ca.gov/projects/esu/esulookup.asp> and follow the directions.
3. Specific description to be carried out under CFIP. Each of the principal headings denoted below should have a separate statement addressing specific methods to be utilized and mitigation measures to be employed in accordance with CFIP Regulations and Environmental Checklist. ALL DESCRIPTIONS FOR PRACTICES WITH MULTIPLE (HIGH, MEDIUM, LOW) RATES MUST INCLUDE A JUSTIFICATION FOR THE RATE REQUESTED. Address CFIP Practices as follows:
 - A. Site Preparation
 - I. Method, target, procedures and standards. Also include clearance distances, degree of vegetation treatment/removal, equipment, erosion control, hazard reduction, locations, restrictions, and timing.
 - II. Additional treatments such as disking/ripping along contours, broadcast burning, burning of piles/windrows.
 - III. Mitigation measures.
 - B. Planting:
 - I. Approximate spacing, method of planting, number of trees per acre, planting standards, seed zone(s), species, and timing.
 - II. Mitigation measures.
 - C. Tree Shelters:
 - I. Type, method of installation
 - D. Follow-up:
 - I. Type, purpose, method, standards, and timing.
 - II. Mitigation measures.

E. Release:

- I. Objective, method, standards, and target. Also include disease prevention needs, equipment, numbers of trees prior/post treatment, pesticide prescription, slash treatment, spacing, timing, and treatment diameters.
- II. Slash treatment (lopping/pile and burn), include fuel loading and treatment objectives, standards and timing.
- III. Additional treatment(s) recommended.
- IV. Mitigation measures.

F. Pre-commercial Thinning:

- I. Objective, method, and standards. Include diameter limit, disease prevention needs, spacing standards or basal area, slash treatment, timing and method.
- II. Additional treatment(s) recommended.
- III. Mitigation measures.

G. Pruning:

- I. Objective and method. **Include the number of trees per acre to be pruned**, and the height to which trees will be pruned (Note that the minimum requirement is ten feet.)
- II. Slash treatment.
- III. Mitigation measures.

H. Land Conservation – Erosion Control or Habitat Improvement Project:

- I. What improvements are intended and how they will be physically accomplished.
- II. Each element of work must be broken down with an estimated cost based on the rates allowed under EQIP.

I. Supervision by a Registered Professional Forester (RPF):

- I. Specific responsibilities that the RPF will administer (by practice) in order to insure quality end products are documented in the CFIP RPF Checklist RM-7.

4. Map - each practice must be keyed to a map which is considered part of the project description. Map must reference range, township, and section #s (or other identifying method, such as assessor parcel number, if the area has not been surveyed). Colored maps will not copy.

A. Topographic map scale will be at least 4 inches = 1 mile.

B. Attach a copy of largest scale USGS map available with project area outlined.

5. Necessary Field Work:

A. Layout project in the field with flagging or marked by readily identifiable existing physical feature, such as roads.

B. Estimate the approximate net acreage of each practice and explain how the acreage was determined.

6. Pest Control Recommendation – If chemicals are going to be used for site preparation, follow-up or release or any other activity proposed in the application, include a statement that a CAL FIRE approved form (RM 30, page 36) completed by a licensed Pest Control Advisor will be submitted to the appropriate CAL FIRE Unit prior to commencement of any chemical application(s).

APPLICATION/PROJECT SUMMARY *(this form available electronically)*

Name(s): _____ PROJECT#: _____

SUMMARY OF PRACTICES TO BE PERFORMED

PRACTICE	LAND CONSERVATION	ACREAGE OR OTHER UNIT*	COST/ACRE OR OTHER UNIT**	TOTAL ESTIMATED PROJECT COST	90% COST SHARE	75% COST SHARE
Management Plan/addendum	<input type="checkbox"/> Yes <input type="checkbox"/> No

INSTRUCTIONS FOR PREPARING THE AGREEMENT PACKAGE

A complete Agreement Package consists of **FOUR (4) ORIGINALS** that include the following:

- CFIP Agreement (**with original signatures**)
- CFIP Application
- Final Project Summary
- Final Project Description
- Project and Location Maps
- Payee Data Record

CFIP APPLICATION (items 1-6) and Project Summary

1. Enter **landowner name(s)** as it appears on the property deed. Use the same name(s) on the CFIP Agreement, Application and the Vendor Data Record. List all legal owners of the property and follow with mailing address(es) and telephone number(s). If there is more than one applicant, briefly explain the legal relationship among the owners; e.g. tenants in common, joint tenants, etc. Use additional sheet if necessary. (Note: Legal owner may be name of limited liability corporation, trust, partnership, etc.)

All individuals listed on the deed (including husband and wife) must sign as participants or provide a Power of Attorney to the landowner who does sign. Therefore, if both spouse's name appears on the deed, both signature must appear on page one of the "Agreement" and "Application."

- A. For multiple landowner applicants, the following information is also needed:

Trusts:

Applicants that hold title to their property in a Trust will need to supply a copy of that portion of the trust document that lists all the trustees, or of the Quit Claim transferring title to the Trust. Trustees not signing the CFIP Application must provide a power of attorney or a notarized letter to CAL FIRE authorizing the person that is signing the CFIP paperwork and/or receiving payments for the Trust to act on their behalf.

IMPORTANT: When the applicant is a Trust, the **Payee Data Record (STD 204)** needs to include the Federal ID number of the Trust. If the trust does not have a Federal ID number then a Social Security number needs to be used. On the Payee/Vendor Data Record check the Individual Sole Proprietor Section and specify whose Social Security number is used. The payment will be recorded against that Social Security number.

If the landowner is a trust and they:

- **DO have an FEIN, mark the TRUST box and insert their FEIN**
- **DO NOT have an FEIN number, mark the INDIVIDUAL OR SOLE PROPRIETOR box and insert their Social Security Number.**

Legal Partnerships, Corporations and Limited Liability Corporations:

Applicants need to supply either a copy of the portion of the Articles of Incorporation that lists all the partners, or officers; or a copy of the Quit Claim transferring title to the entity in question; or minutes of a board meeting and accompanying resolution authorizing the signer as a responsible party or officer with the authority to enter into business agreements or contracts on behalf of the Corporation.

Informal Partnerships:

CFIP applications showing the ownership held as a partnership will require the signatures of all the partners. In lieu of all partners signing the application, a power of attorney (POA) from those partners not signing the application to the partner who does sign the application must also be submitted with the CFIP package. This power of attorney can be general in type or specific to participation in CFIP. The POA must be notarized.

Agencies, Associations or Non-profit Organizations run by Boards of Directors:

CFIP applicants of this type must supply documentation from the board of directors or governing body that the person signing the application is an officer or representative of the association or group. A resolution or letter from the board is needed to verify authority to act on behalf of the association or group. CAL FIRE must verify both issues when processing applications from associations or groups.

B. Cost Share Apportionment:

Multiple Owners:

CFIP Applications with multiple owners must include the portion of the total contract cost share payments to be made to each owner.

Therefore, please provide a separate Project Summary showing practices and cost-share for each party. This will facilitate the delivery of cost share payments to the correct parties. Each payee needs to provide a Payee/Vendor Data Record (STD 204). California is a community property state therefore, in most situations, married couples need only one spouse to sign the Payee/Vendor Data Record. For details, see the Vendor Data Record in the CFIP Agreement Package. Also, for married applicants, unless indicated differently, only one spouse will receive payment after invoicing against the contract.

2. **Responsible Person**-Absentee landowners and joint ownership should designate one representative to communicate with the CAL FIRE forester.
3. **Acreage**-Forestland is defined to be land which is capable of supporting 10 percent or more tree cover with trees native to California, including native oaks (generally Site V (Dunning) or better) and is not zoned for uses which conflict with forest resource management. CFIP cost-sharing is available to forest landowners owning between 20 and 5,000 acres of forestland in California. The system for determining site productivity is Dunning except when explained and justified by an RPF and attached to the application.
4. **Zoning**-"TPZ" means Timberland Production Zone. Please indicate the zoning of each parcel listed in the Table on the Project Summary. If zoning varies, indicate if forest management is one of the uses permitted in any non-TPZ zones. Owners of Non-TPZ forestland proposed for a project must agree not to develop CFIP land for uses which conflict with forest resources management for at least 10 years. This agreement (Land Use Addendum) will be recorded with the county. Owners can be released from the agreement if they refund with interest any CFIP payment received.
5. Work required by the Z'berg-Nejedly Forest Practice Act is not eligible for CFIP cost-sharing. If the land is later damaged by fire, disease or other natural causes, restocking work is eligible for CFIP cost-sharing.
6. **Existing Plan**-If there is a Non-industrial Management Plan, CFIP Management Plan or another type of a Management Plan that will satisfy the requirements be sure to include the number of the plan or the State Contract number for a plan done under a past CFIP project.

Application Project Summary

On the Application Project Summary fill in the name(s) and desired practice information. Practices, acreage and rates must be consistent with the Project Description. Use the table at the bottom of the Summary to show the location of parcel(s) proposed for the project. **Project and Property Location maps, as well as a Project Description must be attached (see instructions on pages 19-20).**

Note: the name on the Project Summary can be amended for brevity and identification; e.g. Brown for Joseph and Susanne Brown, or a location designator for a summary of multiple landowners; e.g. Ponderosa Way Homeowners, although the if there were separate project summaries for each of the landowners their name would appear on each of their individual project summaries.

After your agreement is signed and approved by CAL FIRE, your FAS may advise you that some or all of the additional paperwork listed below is needed before you begin work on your project.

Land-Use Addendum
Management Plan *
Environmental Checklist
RPF Checklist
Pest Control Recommendation

* See page 43-46 for instructions on preparing the Management Plan

The **Land-Use Addendum** is filed with the local County Recorder, and is effective for ten years. The intent is to provide constructive notice that the CFIP project exists and must be maintained. This applies only to non-TPZ zoned lands. **NOTE: THIS FORM MUST BE NOTORIZED.**

The **Management Plan** is the RPF's analysis of the potential needs and opportunities for your land, based upon your objectives. It will clarify what needs to be done, where, and when.

The **Environmental Checklist** (EC) completes the environmental analysis and documentation required by the California Environmental Quality Act (CEQA). The EC must be completed and approved prior to proceeding with contract work. This form is not required for the preparation of CFIP Management Plans.

The **RPF Checklist** clarifies what services your RPF will provide for you. It is required for any project requesting funding for RPF Supervision.

The **Pest Control Recommendation** is written advice concerning the use of pesticides. It must be completed by a Pest Control Advisor if you apply for funding for chemical application.

This form is available electronically

CFIP AGREEMENT page 2 of 4

WHEREAS, under the provisions of the California Forest Improvement Act of 1978, State may enter into cost-sharing agreements with eligible Participants who will undertake forest improvement work upon his/her land; NOW, THEREFORE,

1. In consideration of the forest improvement work to be performed by the Participants, as described in the attached Project Summary, State will reimburse costs incurred for the purpose of undertaking forest improvement work on those lands designated. The maximum amount of reimbursement is the amount stated in Project Summary, "MAXIMUM REIMBURSEMENT". Reimbursement will be made for actual cash expenditures and for goods or services beyond Participant's matching contribution requirement. Reimbursement for such goods and services shall be made in accordance with the State's prevailing rates, provided, however, reimbursement shall not exceed the State's adopted maximum per-acre (or other unit of measure) costs or Participant's actual costs, whichever is less for the forest improvement practices. Expected revenues from products generated will reduce reimbursement and no more than 100% of out of pocket costs are to be recovered.
2. This agreement is conditional upon appropriation and availability of funds for purposes of this contract. In the event such funds are not available in the Budget Act for the fiscal year concerned or are insufficient to carry out the purpose of this agreement, each party agrees to release the other party from all obligations. Funding of the work is also subjected to annual funding decisions. IF FUNDED, NOTICE TO THE PARTICIPANT BY THE STATE WILL BE MADE. **NO WORK MAY COMMENCE WITHOUT THIS NOTICE.**
3. Participant shall promptly submit records at intervals and in such form as State may request. Payment by the State shall be made after an on-site inspection and approval of the practice(s). The Participant shall submit a CFIP Invoice for payment to the local Forestry Assistance Specialist (FAS) of the California Department of Forestry and Fire Protection. A final CFIP Invoice shall be submitted no later than 45 days after completion or expiration of this agreement, as specified on the Project Schedule.
4. The Participant agrees to make immediate monetary restitution of any paid funds for any disallowance of costs or expenditures or unauthorized activities which are disclosed through audit or inspection by the State. If Participant does not complete the five acres of minimum practice(s) of forest improvement work as described and required in Section 1527.1, Chapter 9.5, Title 14 of the California Code of Regulations (CCR) by the end of the term specified herein, all sums previously paid by State shall immediately become due and payable to State.
5. Participant shall comply with all local and State fire and safety laws.
6. The Project Description, Project Schedule, Environmental Checklist, RPF Checklist, Land-Use Addendum and Management Plan are deliverables due prior to commencement of ground practices. Work started prior to the execution of this agreement will not be eligible for funding under the terms of this agreement. Project costs eligible for assistance shall be determined upon the basis of the criteria set forth in Chapter 9.5 of Title 14 of the CCR.
7. Participant shall permit periodic site visits by a representative of the State to ensure program compliance.
8. Participant agrees to indemnify, defend, and save harmless State, its officers, agents and employees from any and all claims and losses occurring or resulting to any and all contractors, subcontractors, suppliers, laborers, and any other person, firm or corporation furnishing or supplying work services, materials, or supplies in connection with the performance of this contract and from any and all claims and losses occurring or resulting to any person, firm, or corporation who may be injured or damaged by the Participant or any agent or employee of Participant in the performance of this agreement.
9. The Participant, and the agents and employees of Participant, in the performance of this agreement, shall act in an independent capacity and not as officers, or employees or agents of the State.

CFIP AGREEMENT page 3 of 4

10. This agreement may be amended, or terminated by mutual consent; it may also be terminated by State or Participant upon the giving of written notice to the other party thirty (30) days in advance.
11. Failure by the Participant to comply with the terms of this agreement shall be cause for the suspension of all obligations of the State.
12. Participant certifies that title to the land upon which forest improvement work will be performed is vested in the persons named in this agreement and that land is under the control and possession of the person(s) named in this agreement.
13. Participant certifies that the parcel of forestland to which the Forest Improvement Program applies will not be developed for uses incompatible with forest resources management within 10 years following recordation date, as explained below. If the parcel of forestland is zoned other than TPZ, pursuant to provisions of Chapter 67 (commencing with Section 52200) of Part 1 of Division 1 of Title 5 of the Government Code, a Land-Use Addendum shall be signed by the Participant and shall be incorporated in and made a part of this agreement. Said Land-Use Addendum shall be recorded in the office of the County Recorder of the county of the affected land and shall be a covenant running with the land.
14. The Participant agrees to comply with the California Environmental Quality Act (CEQA), Workers' Compensation, and all other state and federal laws applicable to the work carried out pursuant to the proposed forest resource improvement project.
15. The Participant, by signing this agreement, does swear under penalty of perjury that no more than one final unappealable finding of contempt of court by a federal court has been issued against the Participant within the immediately preceding two-year period because of the Participant's failure to comply with an order of a federal court which orders Participant to comply with an order of the National Labor Relations Board (Government Code Section 14780.5).
16. Participant shall keep such records as State shall prescribe, including records which fully disclose (a) the disposition of the proceeds of state funding assistance, (b) the total cost of the project in connection with such assistance that is given or used, (c) the amount and nature of that portion of the project cost supplied by other sources, and (d) any other such records as will facilitate an effective audit. All records shall be made available to the State for auditing purposes at reasonable times. Such accounts, documents, and records shall be retained by the Participant for at least three years following project termination.
17. During the performance of this agreement, Participant and its subcontractors shall not unlawfully discriminate, harass or allow harassment, against any employee or applicant for employment because of sex, race, color, ancestry, religious creed, national origin, physical disability (including HIV and AIDS), mental disability, medical condition (cancer), age (over 40), marital status, and denial of family care leave. Participant and subcontractors shall insure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment. Participant and subcontractors shall comply with provisions of the Fair Employment and Housing Act (Government Code, Section 12900 et. Seq.) and the applicable regulations promulgated thereunder (California Code of Regulations, Title 2, Section 7285.0 et. Seq.). The applicable regulations of the Fair Employment and Housing Commission implementing Government Code, Section 12990 (a-f), set forth in Chapter 5 Division 4 of Title 2 of the California Code of Regulations are incorporated into this agreement by reference and made a part hereof as if set forth in full. Participant and its subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have collective bargaining or other agreement. The Participant shall include the nondiscrimination and compliance provisions of this clause in all subcontracts to perform work under the agreement.
18. Participant certifies under penalty of perjury under the laws of the State of California to have, unless exempted, complied with the non-discrimination program requirements of Government Code Section 12990 and California Code of Regulations, Title 2 Section 8103.

CFIP AGREEMENT page 4 of 4

19. Section 7(b) of the Privacy Act of 1974 (Public Law 93-579) requires that any federal, state or local governmental agency which requests an individual to disclose his social security account number shall inform that individual whether that disclosure is mandatory or voluntary, by which statutory or other authority such number is solicited, and what uses will be made of it. The State requests each participant's social security account number on a voluntary basis. However, it should be noted that due to the use of social security account numbers by other agencies for identification purposes, the State may be unable to approve agreements without the social security account number. The State uses social security account numbers for the following purpose: reports to the Department of Fair Employment and Housing, Internal Revenue Service, Franchise Tax Board.
20. The Participant acknowledges that a conflict of interest with the State does not exist pursuant to provisions in Division 2, Chapter 2, Article 8, Sections 10410 and 10411 of the Public Contract Code.
21. The Participant states the information in the Management Plan and/or Management Plan Addendum (Project Description) is proprietary information and claims privilege against its disclosure pursuant to Evidence Code 1060.
22. The contractor or grant recipient hereby certifies compliance with Government Code Section 8355 in matters relating to providing a drug-free workplace. The contractor will:
 1. Publish a statement notifying employees that unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited and specifying actions to be taken against employees for violations, as required by Government Code Section 8355(a).
 2. Establish a Drug-Free Awareness Program as required by Government Code Section 8355(b), to inform employees about all of the following:
 - (a) The dangers of drug abuse in the workplace.
 - (b) The person's or organization's policy of maintaining a drug-free workplace.
 - (c) Any available counseling, rehabilitation and employee assistance programs, and
 - (d) Penalties that may be imposed upon employees for drug abuse violations.
 3. Provide as required by Government Code Section 8355(c) that every employee who works on the proposed contract or grant:
 - (a) Will receive a copy of the company's drug-free policy statement, and
 - (b) Will agree to abide by the terms of the company's statement as a condition of employment on the contract or grant.
23. Contractor shall comply with all federal requirements established under 28 Code of Regulations, Part 36, Americans with Disabilities Act, in order to make programs accessible to all participants and to provide equally effective communications.

CFIP AGREEMENT AMENDMENT

CFIP Project Number: _____ State Contract Number: _____

THIS AMENDMENT is made and entered into by and between the State of California, acting through its duly appointed and qualified Director of the Department of Forestry and Fire Protection, hereinafter called "State," and

_____, hereinafter called "Participant."

1. Under the Agreement numbered above and (originally) dated _____, and as amended on _____
original date date(s) or n/a

Hereafter called "Agreement," State agreed to provide funds for forest improvement work on lands owned or managed by Participant.

1. State and Participant wish to amend the Agreement as follows (check one or more):

- (A) Extend the agreement expiration date to _____ to compensate for delays caused by: _____
- (B) Final invoice due immediately upon completion of project or amendment expiration date whichever is sooner.
- (C) Revise the Project Description (Exhibit A) as attached.
- (D) The budget outline in the Project Summary (Exhibit B) as attached.
- (E) Other. The Agreement is amended as follows (attach revised Exhibits and/or maps):

2. Except as amended herein, all the terms and conditions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, this Amendment is executed upon the signature of both parties and effective _____

LAND USE ADDENDUM

When Recorded Return to:

CALIFORNIA DEPT. OF FORESTRY & FIRE PROTECTION

LAND-USE ADDENDUM

Agreement Concerning Land Uses Incompatible with Resource Management

In further consideration of funds to be provided and actions to be undertaken by State under California forest Improvement Program

Agreement Project/contract _____ dated _____
Number _____

Participant/Owner _____
agrees not to develop lands subject to the CFIP Project Agreement referenced above and shown on the attached project map for uses incompatible with forest resource management within ten (10) years commencing from the date of recording of this Agreement. In the event this Agreement is violated, State is entitled to a refund of any cost-share payments which have been made, with interest, pursuant to Section 4797.5 of Public Resources Code. This Agreement is intended to satisfy the requirements of Public Resources Code Section 4797(e)(2). This Agreement shall apply to only those lands affected by the aforementioned CFIP Agreement and shown on the attached map, which are part of the land described below as part of that real property more fully described in that certain deed from

dated _____ and recorded with the Recorder of _____ County at Book _____

Page _____ or Document Number _____

Subsection	Section	Township	Range	County	Assessor's Parcel #

State shall record this Agreement in the office of the county in which the above described lands are located and upon recording the Agreement shall be binding upon any person to whom such lands are sold, assigned, devised, or otherwise transferred by agreement or operation of law. This Agreement is a state document and shall be filed for no fee at the County Recorder's Office as per Government Code Section 27383. For purposes of this Agreement, "uses incompatible with forest resource management" are defined in Public Resources Code Section 4793(s) to mean "uses not listed as subdivision (h) of section 51100 of the Government Code nor listed pursuant to Section 51111 of the Government Code by the city or county in which the parcel subject to the forest improvement project lies." Government Code Section 51100 defines "compatible use" as being "any use which does not significantly detract from the use of the property for, or inhibit, growing and harvesting timber, and shall include but not be limited to...(1) management for watershed; (2) management for fish and wildlife habitat or hunting and fishing; (3) a use integrally related to the erection, construction, alteration, or maintenance of gas, electric, water, or communication transmission facilities; or (5) grazing." Government code Section 51111 authorizes city and/or county governments to adopt "compatible use" definitions in addition to the above. Compatible uses are land uses permitted in the Timberland Production Zones as established by the Forest Taxation Reform Act of 1976. The intention of the parties to this Agreement, therefore, is to limit the uses of identified lands to those which would be permitted if such lands were within a Timberland Production zone.

STATE OF CALIFORNIA
DEPARTMENT OF FORESTRY & FIRE PROTECTION
CFIP ENVIRONMENTAL CHECKLIST INSTRUCTIONS

The following are instructions and information for the completion of the environmental review of projects being proposed under the California Forest Improvement Program (CFIP).

A Program Environmental Impact Report (PEIR) has been completed for the California Forest Improvement Program. The PEIR identifies standard mitigation measures to minimize adverse environmental impacts caused by CFIP projects. These mitigations and others have been incorporated into CFIP rules (Article 8, Title 14 California Code of Regulations, Sections 1545-1545.9).

Information on resources in the project area and mitigation measures are also found in the Project Description, the Management Plan for the property (if applicable), and from consulting the following individuals, groups or agencies:

- California Department of Fish and Game (F&G)
- Regional Water Quality Control Board (RWQCB)
- California Department of Parks and Recreation (DP&R)
- U.S. Fish and Wildlife Service (USF&WS)
- Native Americans
- CAL FIRE Archeologist
- California Division of Mines & Geology

Completion of the Checklist is based on questions about the project and the site, and the mitigation measures incorporated into the Project Description.

The Department of Forestry & Fire Protection staff will review projects on-site before approving an application. Other reviewing agencies (F&G, RWQCB, DP&R, USF&WS, NMFS) that want to review the project on-site, will be given the opportunity.

There is a 30-day review period for the public and agencies to review project proposals.

Instructions and Information Relating to Specific Items in the Checklist

Water Quality

To complete the section on water quality it is important to determine whether the project is in a watershed that has an approved set of Total Maximum Daily Load (TMDL) requirements. These requirements must be met in addition to those required by CFIP.

Item 1. Streams for the purpose of completing the Checklist are watercourses as defined and classified in the Forest Practice Rules.

Item 2. Delineate any landslide areas, potential and actual, on the project map(s). If the project will be on or adjacent to an unstable area a geologist should be consulted to determine the impacts of the project on slope stability.

Item 3. All watercourses supporting salmonoid fisheries will not have shade cover reduced except where a watercourse is being restored and except as agreed to by the appropriate agencies. The Forest Practice Rules for retention of shade canopy will be followed as a minimum.

Item 4. The potential for watercourse turbidity and sediment load increases and mitigation to minimize the potential will be discussed in the Project Description.

Item 5. Forest Practice Rules regarding deposition of slash and debris in watercourses will be followed.

Item 7. Show any domestic water supply sources on the Management Plan/project map and delineate a protection area around such water supply sources to protect water quality. In the Project Description, discuss how project activities in the vicinity of the protection area will be carried out to prevent water quality degradation.

Item 8. Discuss in the Project Description any circumstances or project site conditions (e.g. soil type, size of project, soil moisture) that would indicate the Resource Protection Guidelines would not adequately mitigate surface erosion effects. Examples might be projects on decomposed granite soils, or actively down-cutting gullies.

Wildlife

Item 10. Habitat is altered during vegetation manipulation. Significant changes in habitat structure will be assessed in the Project Description and evaluated through the Checklist.

Item 11. If the applicant does not consult the Department of Fish and Game's Natural Diversity Data Base or the California Native Plant Society registers before submission of the application the CAL FIRE Forester reviewing the application shall consult these sources of information to assist in determining potential impacts of the project.

Delineate any sensitive areas, including wet meadow sites or significant migration routes, on the Project Map. In the Project Description, discuss how the CFIP activities influencing important habitat areas will be carried out to minimize disturbance.

If the occurrence of a listed species is likely in the project area, a consultation with the appropriate agency, DFG or USF&W, will be initiated. If such species are present, a Special Treatment Area will be designated and no forest improvement practices will be performed unless they clearly benefit the protected species.

Forest Insects and Diseases

Item 12-14. The practices required to address various insect or disease problems can change. The use of the Forest Practice Rules should not be considered the only requirements. It is suggested that forest insect and disease specialists be contacted for the latest practices. It is also suggested that the information related to the creation of a Zone of Infestation for a pest be reviewed for suggested practices.

Fire

Item 15-17. Fire is a concern of importance when undertaking resource management projects. The Project Description will address issues of control, if fire is to be used as a tool. All treatments that create slash must be treated to meet or exceed the standards described in the Forest Practice Rules.

Archaeological, Historical, and Cultural Resources

Item 18. Each project must be evaluated for potential impact to archaeological, historical, and cultural resources. This evaluation is conducted by the CAL FIRE Forester and/or the RPF assisted by a CAL FIRE Archaeologist. An archaeological survey report or clearance letter signed by a CAL FIRE Archaeologist, must be included in the project file to support the findings in the Environmental Checklist. The CAL FIRE Archaeologist must be consulted for every project, and can provide information and assistance to complete the archaeological review tasks, or may complete them for the CAL FIRE Forester or RPF.

Keep all information on archaeology/historical sites confidential. In the Management Plan and Project Description, indicate that archaeological/historical sites will be protected in the manner described in the confidential information.

Item 19. Effects beyond the scope of the Program EIR will have to be addressed through a negative declaration, exemption, or some other means before a project can start.

California Forest Improvement Program (CFIP) Project Review Environmental Checklist

(This form is available electronically)

Applicant's Name: _____ CFIP Project No.: _____

The information contained in the Project Description, the Program Environmental Impact Report, the Management Plan (if applicable), contacts with Department of Fish and Game, Regional Water Quality Control Board, Department of Parks and Recreation, U.S. Fish and Wildlife Service, National Marine Fisheries Service, and the CFIP rules provide the basis for completing the checklist.

Check the appropriate effect and mitigation measures to be applied. Enter N/A where the effect is not applicable.

EFFECT	MITIGATION
Water Quality	
1. Soil deposition in streams caused by accelerated erosion due to the use of heavy equipment to remove vegetation. NOTE: For the purpose of completing the checklist streams are defined and classified as watercourses as per the Forest Practice Rules.	1a. Brush scalped off slopes will be windrowed along the contour and burned leaving effective berms of residual soil to impede surface water flow.
	1b. No heavy equipment on excessively wet soils.
	1c. As a minimum no heavy equipment operate within an equipment exclusion zone, providing a buffer strip.
	1d. Other
2. Landslides and slope failure due to heavy equipment operation on currently and potentially unstable lands. NOTE: See instructions for additional information.	2a. No heavy equipment on current or potentially active slide area.
	2b. Other
3. Increased water temperatures due to removal of watercourse shading. NOTE: The watercourse protection measures for shade canopy retention as described in the Forest Practice Rules are to be used for completing the checklist.	3a. Riparian vegetation will not be removed.
	3b. Other vegetation will be left as necessary to maintain stream temperature.
	3c. Other
4. Increased turbidity and sediment load in streams from clearing stream channels. Note: See note for item 1.	4a. Compliance with California Department of Fish and Game permit requirements.
	4b. Use of manual methods to substitute for winch lines and heavy equipment.
	4c. To reduce soil loss areas of bare soil greater than 500 square feet will be treated within the standard watercourse and lake protection zones as described in the Forest Practice Rules.
	4d. Other
5. Deposition of slash or debris in streams.	5a. All areas below the stream and lake transition line of Class I, II and III watercourses as described in the Forest Practice Rules will be kept free of slash and debris, except as intended for woody debris enhancement for fisheries and wildlife.
	5b. Accidental deposits will be immediately removed. Removal will be consistent with the requirements found in California's Forest Practice Rules.
	5c. Other r
6. Accidental off-target deposition of herbicides due to spills and aerial drift.	6a. Compliance with Federal, State and local rules will minimize the chance of this effect. These rules also address spills.
	6b. Other
7. Effect on domestic water supplies from sediment deposits. NOTE: See instructions for additional information. Also the protection of domestic water supplies shall be consistent with the requirements found in California's Forest Practice Rules.	7a. A Special Treatment Area is established around domestic water supplies to protect them.
	7b. Other

8. Unusual circumstances or project site conditions (e.g. soil type, slope, size of project, soil moisture) which could result in surface erosion effects which are not adequately mitigated by the requirements in the Resource Protection Guidelines	8a. Effects beyond the scope of the Program EIR and additional review required. NOTE: See instructions for additional information
	8b. Other
9. Siltation of stream caused by accelerated erosion after vegetation removal.	9a. Effects beyond scope of Program EIR and additional review required.
	9b. Other
Wildlife	
10. Reduction of wildlife forage and cover from site preparation or clean and release practices.	10a. Retention of black oaks and other mast-producing plants will occur.
	10b. Retention of 1-3 acre patches of brush cover to provide "edge effect."
	10c. There will be limited brush removal from around the bases of trees.
	10d. Substitute forage will be planted and/or browse plants will be rejuvenated.
	10e. Piles of brush will be left for birds or small mammal use.
	10f. Other
Rare and Endangered Species	
11. Impact to rare, endangered or sensitive species habitat or wildlife as part of vegetation manipulation. NOTE: See instructions for additional information.	11a. The Department of Fish and Game's Natural Diversity Data Base and the California Native Plant Society registers were consulted for evidence of such occurrences in the project area.
	11b. No species were identified.
	11c. Species were identified, a special treatment area was designated and no forest improvement practice will be performed that will impact the species.
	11d. Snags with visual evidence of use for nesting and roosting sites for rare and endangered species shall be protected.
	11e. Other
Forest Insects and Diseases	
NOTE: See instructions for additional information.	
12. Possible infestation of residual stands of pines with <u>lps</u> and <u>Dendroctonus</u> beetles if slash from wet season pre-commercial thinning operation not adequately disposed.	12a. The requirements described in the Forest Practice Rules Technical Rule Addendum Number 3 will be followed.
	12b. Different species of conifers will be planted on the site to minimize the recurrence of the stand conditions that favored the infestation.
	12c. Other
13. Infestation of pine stands with root rot pathogens after pre-commercial thinning.	13a. Application of borax on thinned stumps will occur.
	13b. Other

14. The project is within the Zone of Infestation for pitch canker.	14a. Infected or contaminated plant material will not be transported to areas that are free of the disease.
	14b. No disease symptoms in project area.
	14c. Tools used in cutting diseased trees will be cleaned with disinfectant before using them on uninfected trees.
	14d. Other
Fire	
15. Particulates in the air from burning brush and slash.	15a. Compliance with Air Resource Board rules and local ordinances.
	15b. Other
16. Slash build-up after pre-commercial thinning increases fire hazard.	16a. Slash will be treated to at least the standards described in the Forest Practice Rules for the area.
	16b. Other
17. Risk of fire escaping.	17a. Compliance with all state and local laws and regulations.
	17b. Other
Archaeological, Historical and Cultural Resources	
18. Potential significant disturbance of archaeological, historic, or cultural resources.	18a. A current archaeological records check was conducted at the appropriate Information Center of the California Historical Resource Information System.
	18b. Written notification was sent to local Native American groups and individuals, in the same manner as described in the Forest Practice Rules.
	18c. Written notification was sent to local Historical societies or similar organizations, requesting information about historical resources that may exist within the project.
	18d. A professional archeologist or an archaeologically-trained resource professional conducted an archaeological survey.
	18e. Archaeological, historic and cultural resource sites that exist within the project area were identified, evaluated, mapped, and recorded in accordance with professional archaeological standards.
	18f. Appropriate protection measures were developed for known archaeological, historical or cultural resource sites. These protection measures were developed in consultation with a CAL FIRE archeologist.
	18g. The archaeological investigation was documented on the CAL FIRE Project Review Report For Archaeological and Historical Resources Form, or an equivalent to it. The report was reviewed and approved by a CAL FIRE Archeologist for adequacy and concurrence of findings.
	18h. Other
Other	
19. Project may result in significant environmental effects other than those listed above.	19a. Effects beyond scope of the Program EIR. Additional review will be required.
	19b. Other

Certification

I certify that I have reviewed the pertinent information and inspected the proposed CFIP project area. After evaluating the proposed project and incorporating mitigation measures, I have determined:

- Mitigation has been incorporated into this project as necessary to avoid, reduce, or minimize impacts to less-than-significant level.
- Implementing this project will result in no significant environmental impacts and no new California Environmental Quality Act documentation is required.

Instructions for Completing the Written Pest Control Recommendation

1. Include the name and address of the grower, agency or firm for whom the recommendation is written.
2. Include the date the recommendation expires.
3. Provide information on how to locate the property or site to be treated.
4. Indicate the commodity, crop or site to be treated.
5. Indicate the total acres or units to be treated.
6. Check the box adjacent to the method of application.
7. Identification of pest to be controlled by recognized common name.
8. Name of pesticide (common name or trade name), dosage rate per acre or other units, dilution rate and volume per acre.
9. Check the box adjacent to the applicable hazard(s) and/or restriction(s).
10. Indicate the schedule, time or conditions for the application in relation to temperature, time of day, irrigation, etc. Also, include any label restrictions on use or disposition of crop or by-product.
11. Indicate any surrounding crops that may be sensitive to the recommended treatment.
12. Identify any occupied dwellings, field workers, pets or livestock in the proximity of the treatment area.
13. Indicate any non-pesticide substance, pest control method or device that will be used to control pest(s). Warning of the possibility of damages by the pesticide applicator that reasonable should have been known to exist at the time of the recommendation.
14. Check the box adjacent to the criteria used for determining need for pest control treatment.
15. Check the box adjacent to the applicable crop and site restrictions.
16. Signature of the licensed pest control adviser or person acting in the capacity of a pest control adviser in accordance with the licensing exemption under Section 12001 of the California Food and Agriculture Code. The date the recommendation was made, and if applicable the adviser's license number. Also, include the name and address of the adviser's employer.

Map-Sketch the property or site to be treated and any surrounding hazards that are known to exist.

PEST CONTROL RECOMMENDATION

1. Operator of the property: _____ 2. Recommendation Expiration Date: _____

Address: _____ County: _____

3. Location to be treated: _____

4. Commodity to be treated: _____ 5. Acres or units to be treated: _____

6. Method of application: Air Ground Other Explain
 Fumigation

7. Pest(s) to be controlled:

8. Name of pesticide(s):	Rate per acre or unit:	Dilution Rate:	Volume per acre or unit:

9. Hazards and/or restrictions:
- Highly toxic to bees.
 - Toxic to birds, fish, and wildlife.
 - Do not apply during irrigation or when run-off is likely to occur.
 - Do not apply near desirable plants.
 - Do not allow to drift onto humans, animals, desirable plants, or property.
 - Keep out of lakes, streams, and ponds.
 - Birds feeding on treated area may be killed.
 - Do not apply when foliage is wet (dew, rain, etc.).
 - May cause allergic reaction to some people.
 - This product is corrosive and reacts with certain materials (see label).
 - Closed system required.
 - Restricted use pesticide (California and/or Federal).
 - Hazardous area involved (see maps and warnings).
 - Other (see attachment).

10. Schedule, time or conditions:
11. Surrounding crop hazards:
12. Proximity of occupied dwelling, people pets, or livestock.
13. Non-pesticide pest control, warnings, and other remarks:
14. Criteria used for determining need for pest control treatment:
- Sweep net counts Field observation
 - Leaf of fruit counts Preventive
 - Soil sampling History
 - Pheromone or other trap
 - Other

15. Crop and site restrictions:
- Worker reentry interval _____ days.
 - Do not use within _____ days of harvest/slaughter.
 - Posting required: Yes No _____ days.
 - Do no irrigate for at least _____ days after application.
 - Do not apply more than _____ application(s) per season.
 - Do not feed treated foliage or straw to livestock.
 - Plantback restrictions (see label).
 - Other (see attachment): _____

16. I certify that alternatives and mitigation measures that would substantially lessen any significant adverse impact on the environment have been considered and, if feasible, adopted.

Guide to completing Payee data Record, STD. 204

1 A completed Payee Data Record, STD. 204, is required for payments to all non-governmental entities and will be kept on file at each State agency. Since each State agency with which you do business must have a separate STD. 204. on file, it is possible for a payee to receive this form from various State agencies.

Payees who do not wish to complete the STD. 204 may elect to not do business with the State. If the payee does not complete the STD. 204 and the required payee data is not otherwise provided, payment may be reduced for federal backup withholding and nonresident State income tax withholding. Amounts reported on Information returns (1099) are in accordance with the Internal Revenue Code and the California Revenue and Taxation Code.

2 Enter the Payee's legal business name. Sole proprietorships must also include the owner's full name. An individual must list his/her full name. The mailing address should be the address at which the payee chooses to receive correspondence. Do not enter payment address or lock box information here.

3 Check the box that corresponds to the payee business type. Check only one box. Corporations must check the box that identifies the type of corporation. The State of California requires that all parties entering into business transactions that may lead to payment(s) from the State provide their Taxpayer identification Number (TIN). The TIN is required by the California Revenue and Taxation Code Section 18646 to facilitate tax compliance enforcement activities and the preparation of Form 1099 and other information returns as required by the Internal Revenue Code Section 6109(a).

The TIN for individuals and sole proprietorships is the Social Security Number (SSN). Only partnerships, estates, trusts, and corporations will enter their Federal Employer Identification Number FEIN).

4 Are you a California resident or nonresident?

A corporation will be defined as a "resident" if it has a permanent place of business in California or is qualified through the Secretary of State to do business in California.

A partnership is considered a resident partnership if it has a permanent place of business in California. An estate is a resident if the decedent was a California resident at time of death. A trust is a resident if at least one trustee is a California resident.

For individuals and sole proprietors, the term "resident" includes every individual who is in California for other than a temporary or transitory purpose and any individual domiciled in California who is absent for a temporary or transitory purpose. Generally, an individual who comes to California for a purpose that will extend over a long or indefinite period will be considered a resident. However, an individual who comes to perform a particular contract of short duration will be considered a nonresident.

Payments to all nonresidents may be subject to withholding. Nonresident payees performing services in California or receiving rent, lease, or royalty payments from property (real or personal) located in California will have 7% of their total payments withheld for State income taxes. However, no withholding is required if total payments to the payee are \$1,500 or less for the calendar year.

For information on Nonresident Withholding, contact the Franchise Tax Board at the numbers listed below:
Withholding services and Compliance Section: 1-888-792-4900 E-Mail Address: wscs.gen@ftb.ca.gov
For hearing impaired with TDD, call: 1-800-822-6268 Website: www.ftb.ca.gov

5 Provide the name, title, signature, and telephone number of the individual completing this form. Provide the date the form was completed.

6 This section must be completed by the State agency requesting the STD. 204.

PRIVACY STATEMENT

Section 7(b) of the Privacy Act of 1974 (Public Law 93-579) requires that any federal, state or local governmental agency which requests an individual to disclose their social security account number shall inform that individual whether that disclosure is mandatory or voluntary, by which statutory or other authority such number is solicited, and what uses will be made of it.

It is mandatory to furnish the information requested. Federal law requires that payment for which the requested information is not provided is subject to federal backup withholding and State law imposes noncompliance penalties of up to \$20,000.

You have the right to access records containing your personal information, such as your SSN. To exercise that right, please contact the business services unit or the accounts payable unit of the state agency(ies) with which you transact that business.

All questions should be referred to the requesting State agency listed on the bottom front of this form.

California Cooperative Forest Management Plan

INSTRUCTIONS FOR PREPARING

California Cooperative Forest Management Plan

BACKGROUND

The enabling legislation for the California Forest Improvement Program (CFIP) requires that a Forest Management Plan be prepared and approved prior to a forest resource improvement project being started. The Plan shall describe, in general:

- a. the condition and capabilities of the forestland property, including original forest type if determinable;
- b. the participant's long-range management objectives, including provisions for eventual harvest of saw timber; and
- c. needed forest resource improvement work consistent with protecting, enhancing, and maintaining forest productivity.

SCOPE

A CFIP Management Plan shall be written to cover all forestland within the same ownership surrounding or contiguous to the parcel proposed for the CFIP project. The Management Plan should include the objectives of the participant and should be a flexible instrument that can be amended by the participant as needs and economic conditions change. Additionally the CFIP Management Plan is a plan that addresses individual landowner objectives while adhering to National and State Forest Stewardship Management Plan guidelines.

INSTRUCTIONS

Management Plans shall be constructed using the California Cooperative Forest Management Plan. **(See Addendum B)**

The California Cooperative Forest Management Plan shall be based primarily on the participant's objectives. The plan shall provide sufficient historical and resource baseline data to formulate alternatives for forest improvement, compare alternatives and provide a recommended course of action to optimize forest productivity.

Various alternatives will be proposed involving analysis of factors such as economics, product markets, impacts to the property and surrounding ownerships, etc.

Each plan will be unique. Plans for large acreage ownerships are expected to contain more information than small ownerships because of items like more soil types, vegetation diversity, wildlife habitat etc. The following categories will be covered as a minimum requirement in preparing the Management Plan:

MINI MANAGEMENT PLAN

CFIP User Guide “Mini Plan” Policy

1. The Mini Plan format is available for use for all authorized CFIP forest improvement projects to all landowners who own less than 50 acres of forest land contiguous with their project, or for ownerships less than 5000 acres for projects addressing substantially damaged forest lands with conditions described in the Forest Practice Rules in 14 CCR 895.1. For substantially damaged land in need of immediate restoration, the plan would be for the project area only. The Mini Plan may also be used for those instances when landowners combine ownerships in order to meet the “20-acre” requirement, even if the “collective acreage exceeds or is equal to 50 acres, as long as no group member owns 50 acres or more of forestland.
2. Costs of the Mini Plan are to be based on complexity of the plan and size of the ownership. Cost may be negotiated lower but not in excess of the maximum Mini Plan cap rate.
3. Cost share payment to a landowner who uses the Mini Plan to satisfy CFIP requirements is a one-time occurrence. If the Mini Plan is used on a property, and paid for with CFIP cost-share funding, no CFIP cost share funds will be allowed in the future to update the plan or convert it to a California Cooperative Forest Management Plan template (full plan).
4. RPFs developing full plans or Mini Plan on their own property will only be paid at the Mini Plan rates. RPFs developing full plans on their own property will be allowed to negotiate above the Mini Plan rate if negotiations are supported by cost estimates for paying employees who are working on plan development. CFIP Invoices for reimbursement must be supported by proof of payments to employees.
5. RPFs and landowners who elect to prepare a Mini Plan will be advised by the appropriate CAL FIRE Forestry Assistance Specialist (FAS) as to the format and information required. A Mini Plan will not qualify the landowner for federal project funding.
6. Prior to submitting the CFIP application and agreement to Sacramento for funding, estimated plan costs must be reviewed by the Unit FAS who will be signing the management plan as accepted and approving and submitting the invoice for payment.
7. Upon recommendation from the Northern or Southern Resource Management Forestry and Fire Protection Administrator, the Mini Plan format may be used for projects/landowners who do not meet the criteria of #1 above. However, this is on a case by case basis and must be explained and justified as well as accompanied by a budget as per #2 above and approved by the Deputy Director of Resource Management. All other limitations of a mini plan will apply as per above.

CFIP INVOICE

CFIP INVOICE INSTRUCTIONS

When work is completed on all or a portion of your project, sign the invoice and submit it to the CAL FIRE forester with copies of bills, invoices, cancelled checks or other proof of payment. If you provided labor, equipment or materials for the project complete and sign the Cost Accounting Worksheet. Check with your CAL FIRE forester regarding the allowable rates for in-kind labor.

Reimbursement will be made for actual cash expenditures and for goods or services beyond Participant's matching contribution requirement. Reimbursement for such goods and services shall be made in accordance with the State's prevailing rates, provided, however, reimbursement shall not exceed the State's adopted maximum per-acre (or other unit of measure) costs or Participant's actual costs, whichever is less.

What this means is that you can't be reimbursed for more money per practice than the contract allows.

For Example:

If your contract allows for 75% of \$200 per acre, but the final cost was actually \$210 per acre, the state will only pay \$180 per acre (75% of \$200). Also, if your actual cost was \$150 per acre, and the contract allowed 75% of \$200, the state will only pay \$112.50 per acre (75% of \$150).

Instructions for filling out the Invoice Form:

1. Fill in your name and address as it appears on the CFIP contract.
2. Put in the CFIP Project number and the contract number at it appears on your Agreement.
3. Check (✓ or X) whether this is an interim or the final invoice. Final invoice means that you will be billing for no additional work against this contract.
4. ON THE LEFT SIDE OF THE INVOICE in each of the appropriate categories enter the date that the work, for which you are billing, was completed.
5. Put the total acres you or your forester calculated was accomplished or for which you were billed from the contractor.
6. Enter the total actual cost for which you were billed.
7. Add the totals (optional)
8. Enter the amount of the total from this invoice that you attribute to your own labor.
9. Sign and attach copies of all pertinent bills and, if you provided labor, equipment or materials to any of the costs associated with the invoice, show breakdown of your actual expenses. If invoice for a new or revised management plan, include a copy. You can use the Cost Accounting Worksheet as shown on page 52 or some similar method. If invoice is for a new or revised management plan, include a copy of the plan
10. Send invoice package as per 9 above to the local CAL FIRE unit with which you have the agreement in order to get an inspection.

11. DO NOT PUT ANYTHING IN THE BOX ON THE RIGHT SIDE OF THE FORM WHICH STATES: For CAL FIRE Use Only .

EXAMPLE A: You have a contract that includes 20 acres of site preparation, 20 acres of trees and planting and 20 acres of follow-up. Your contract allows for Site Preparation at \$300/acre, planting at \$200/acre and follow-up for \$150/acre. Your reimbursement rate is 75%.

You have completed 10 acres of site preparation on 10/16/04 which totaled \$2700.00, 8 acres of planting on 2/10/05 costing \$1800.00 and 8 acres of follow-up on 6/01/05 at \$1200.00. You have done none of the work yourself.

You still have plans to finish the contract in the future so when you fill out your invoice form you check INTERIM.

Your form would look like the one on page 55.

The contract rate is 75% so you would enter ($\$5700 \times 75\% =$) \$4275.00 as your reimbursement.

EXAMPLE B: After receiving a copy of the invoice the CAL FIRE Forestry Assistance Specialist (FAS) inspects the area and determines that the site preparation, planting and follow-up activities have been done and agrees with the acreage calculations. However, the contract only allows \$200 per acre for planting costs. So CAL FIRE would only be able to approve costs totaling (8 acres x \$200 =) \$1600.00. The FAS would enter that amount in the cost column. The revised total would be \$5500. (see Example for FAS, page 56.)

The "TOTAL PAYABLE BY THE STATE" would be based on the revised total or \$4125.00. The FAS signs the invoice and sends it in for payment.

CFIP RPF CHECKLIST

CFIP Project Number: _____ State Contract Number: _____

Supervision is a category to help landowners pay for the services of a consulting forester from project beginning to end. The objective is to improve the quality of the projects and to promptly complete projects. Supervision will involve forestry services of a Registered Professional Forester. The Project Description will list the specific responsibilities the RPF is engaged to provide. To satisfy this requirement, the RPF must complete this form. Responsibilities noted with an * are optional, all others required. RPF to check "Accept Responsibility" spaces provided as appropriate. Also complete this form, checking the appropriate boxes for "Items Completed" and include with CFIP Invoice, RM-14, when billing for supervision services.

Specific Responsibilities for Registered Professional Forester Supervision (Check appropriate item)

	Accept Responsibility	Item Completed
Site Preparation		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend contractor to Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Monitor, coordinate and recommend corrective actions to contractor.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect project during and after work completed.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection required additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation	<input type="checkbox"/>	<input type="checkbox"/>
Tree and Planting		
1. Implement project description	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend appropriate nursery, transportation system for delivery & Storage	<input type="checkbox"/>	<input type="checkbox"/>
3. Order stock or negotiate with contract nursery for stock.	<input type="checkbox"/>	<input type="checkbox"/>
4. Recommend tree planting contractor.	<input type="checkbox"/>	<input type="checkbox"/>
5. Coordinate, monitor and recommend corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
6. Field inspect during and after planting.	<input type="checkbox"/>	<input type="checkbox"/>
7. Prepare invoice and documentation for submittal to Participant and State	<input type="checkbox"/>	<input type="checkbox"/>
8. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
9. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
10. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>
Tree Shelters		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend a contractor to the Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Coordinate, monitor, and recommend corrective actions to contractors.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>
Follow-up		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend specific tasks upon planting and for the next growing season.	<input type="checkbox"/>	<input type="checkbox"/>
3. Recommend a contractor, coordinate, monitor and recommend corrective action to follow-up	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>

	Accept Responsibility	Item Completed
Pre-Commercial Thinning		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend a contractor to the Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Coordinate, monitor, and recommend corrective actions to contractors.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>
Pruning		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend a contractor to the Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Coordinate, monitor, and recommend corrective actions to contractors.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State.	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>
Release		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend a contractor to the Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Coordinate, monitor, and recommend corrective actions to contractors.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State.	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>
Land Conservation		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend a contractor to the Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Coordinate, monitor, and recommend corrective actions to contractors.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State.	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>
Wildlife/Fisheries		
1. Implement project description.	<input type="checkbox"/>	<input type="checkbox"/>
2. Recommend a contractor to the Participant.	<input type="checkbox"/>	<input type="checkbox"/>
3. Coordinate, monitor, and recommend corrective actions to contractors.	<input type="checkbox"/>	<input type="checkbox"/>
4. Field inspect during work and after completion.	<input type="checkbox"/>	<input type="checkbox"/>
5. Prepare invoice and documentation for submittal to Participant and State.	<input type="checkbox"/>	<input type="checkbox"/>
6. If CAL FIRE inspection requires additional work, take corrective action.	<input type="checkbox"/>	<input type="checkbox"/>
7. All of the above.	<input type="checkbox"/>	<input type="checkbox"/>
8. Other, attach explanation.	<input type="checkbox"/>	<input type="checkbox"/>

I certify that the above checked items will be or have been completed.

ADDENDUMS

RESCISSION OF LAND USE ADDENDUM

When Recorded Return to:

CALIFORNIA DEPARTMENT OF FORESTRY
AND FIRE PROTECTION
Resource Management
Attn: CFIP Coordinator, Room 1516-22
P.O. Box 944246
Sacramento, CA 94244-2460

RESCISSION OF LAND USE ADDENDUM

The previously recorded Land Use Addendum for California Forest Improvement Program Agreement Project Number _____ dated _____ between the Participant, _____, and the State of California, Department of Forestry and Fire Protection, as recorded in book _____, page _____, dated _____, record number _____, is hereby rescinded. This rescission applies to lands described as below:

Signature: _____ Dated: _____.

Printed name, title: _____
Agent for the State of California, Department of Forestry and Fire Protection

California Cooperative Forest Management Plan

(Form available electronically)

Property Name: _____

Property Location Address: _____

Owner Name (s): _____

Plan Author:

Signature: _____

Phone: _____

RPF#: _____

This management plan outlines the conditions and capability of property resources, documents the landowner's objectives and decisions and identifies potential resource improvement projects. It is meant to be a flexible and educational document that considers a planning horizon of at least 5 years but may include objectives that require a much longer time period.

This management plan template meets management plan requirements for grant agreements and other provisions available through CAL FIRE, NRCS, USFS, and the American Tree Farm Association. Signature Pages are provided to document acceptance of this management plan in meeting those requirements.

This management plan is a tool for and belongs to the landowner. Signatures are only required for that entity providing funding as requested by the landowner.

SIGNATURES AND APPROVALS

This Forest Management Plan is provided as a guide to help you accomplish the objectives that you have for your forest. This Forest Management Plan will guide you in achieving the benefits of managing your forest and forest related resources. With this Forest Management Plan, you are eligible to participate in the California Department of Forestry and Fire Protections California Forest Improvement Program (CFIP), US Forest Service's Forest Stewardship Program (USFS), the American Forest Foundation's American Tree Farm System (ATFS) and The Natural Resources Conservation Service (NRCS) programs. This plan will need to be reviewed and approved by representatives for each of the programs that are providing funding.

I have reviewed this plan and approve its content.

Landowner (s) _____
Date

USFS Forest Stewardship Program

I certify that this Forest Management Plan meets the requirements of the federal Forest Stewardship Program.

Plan Preparer _____
Date

I certify that this Forest Management Plan meets the requirements of the federal Forest Stewardship Program.

Management Plan History

Does a Management Plan exist for this property?: Yes _____ No _____

If Yes:

Type of Plan: (CFIP, EQIP, NTMP, FSP, CAP, Other): _____

Date of Original Plan Completion: _____

Revision Dates: _____

NOTE: Past Plans and Current Amendments are appended to this Document.

PROPERTY DESCRIPTION

Legal Property Description: _____

Nearest city or Town: _____

County: _____

Assessor's Parcel Number: _____

GPS Coordinates: _____

Total ownership acreage: _____

Total forested acreage: _____

Does Landowner reside on the property?: Yes _____ No _____

Describe the overall topography including slope, aspect and elevation:

Estimate percent of total acreage that is:

Simple topography (few ravines and changes of aspect) _____%

Percent of Land: Flat (<5% grade) _____ Gentle (< 20% grade) _____ Steep (> 35% grade) _____

Transportation System:

Vehicle Access (check): _____ Excellent (80% accessible) _____ Good (at least 50%)

_____ Fair (at least 25%) _____ Poor (less than 10%)

Estimated improved road length (rock surface): _____

Estimated unimproved road length: _____

Watershed Information:

CALWATER 2.2 planning watershed: _____ Acres within this watershed: _____

Is there a 303d listing on watershed?: _____ what are the factors?: _____

Tract and Farm number (if suitable): _____

NOTE: Use as much space as needed to answer the remainder of this document

PROPERTY HISTORY

- **This section is based on personal knowledge from landowner, neighbors and others, property records, and local information sources as well as evidence seen on the ground; stumps, skid trails, etc.**
- **Discuss past management history including past timber harvests (include THP # after 1970s), conservation practices (include those completed under public incentive agreements) and catastrophic events.**

CURRENT PROPERTY CONDITIONS

Property Infrastructure

- **Discuss existing improvements (including dwellings, roads and access, outbuildings, fencing, water improvements, wells, power lines, etc).**
- Note property security measures including trespass and fire protection.

Forest Infrastructure

- **Discuss overall forest structure, percent of productive forest soils, regeneration levels and current silvicultural practices.**
- **Note current conservation practices for plant, water, wildlife and air resources as well as insect and /or disease problems.**
- **Discuss current recreational uses, and aesthetic values.**
- **Discuss current markets.**

Roads

- **Assess and map roads system and major trails; depict stream crossings and/or culvert conditions and needed drainage improvements. Are they sized for 100 year storm events?**
- **Describe conservation practices for general maintenance, erosion reduction, road surface condition and Runoff, drainage-dips, culverts, stream crossings, weed control, and time-of-year use.**

Access and Security

- **Are property boundaries identified including fences, gates, and boundary/corner markers?**
- **Are unwanted trespass activities known?**

Recreation

- **Describe and plan for recreational opportunities and identify supporting resources.**

Invasive Species

- **Discuss invasive species found and designed eradication measures.**

Climate Considerations and Carbon Sequestration

- **Discuss practices for the possibility of implementing carbon sequestration activities.**

Adjacent Ownership Concerns

- **Review aesthetic quality, wildfire, privacy, wildlife movement and habitat, noxious weeds, and other concerns and how the property management interacts with neighboring properties.**

Economic Sustainability

- **Discuss the value of a business plan and potential resource development.**
- **Discuss tax liability and opportunities.**

Soil Description, Site Description and Protection Measures (Include a soil map)

- Describe soil types, site class, potential growth/acre/year, erosion hazard ratings, equipment limitations, known geological hazards and landslides.
- Append the soil description and, if available, the ecological site description (ESD).
- Discuss conservation practices for steep slopes, woody debris retention, nutrient cycling, vehicle travel, soil compaction, flood runoff, and livestock issues.

Streams, Wetlands, and Ponds

- Describe water resources present including streams, wetlands, ponds, etc and their FPA classifications, and note their 303(d) status and/or aquatic based T&E species concerns.
- Discuss conservation practices for riparian habitat, wetlands, fish and wildlife concerns, endangered species protection, road crossings, and water protection zones.

Air Resources

- Discuss smoke management issues with prescribe fire or pile burning and unwanted biomass removal alternatives
- Note the climate values of this forest with climate amelioration and carbon sequestration.

Fish & Aquatic Species

- Identify fish streams and note streams with anadromous fish or listed fish species as well as other significant aquatic species using the water resources and riparian area(s)
- Describe general condition of the fish habitat including large wood, pools, riparian cover, migration barriers and current or desired buffer widths.
- Describe potential habitat improvements.

Upland Wildlife

- Identify bird and animal species observed or known to be present
- Describe general condition of habitat and the habitat elements such as den sites, snag retention, downed wood, migration corridors and water sources.
- Describe potential habitat improvements such as access, nest boxes, hunting, water development, and domestic animal control.

List State and Federal threatened or endangered species - plants or animals

- Discuss T&E species observed or known and provide the results of the California Department of Fish and Game NDDB and BIOS information sites for three miles of the property.

LANDOWNER MANAGEMENT OBJECTIVES

Silvics (growing and tending of forests)

Desired Forest Condition:

Pest/Fire

Fire protection objectives.

Forest Health objectives including insects and disease

Invasive species, plant and animal, concerns

Trespass concerns.

Wildlife

Desired species habitat improvement:

Additional Objectives For:

Livestock:

Aesthetics:

Income:

Family Legacy:

Other:

MANAGEMENT PLAN IMPLEMENTATION

Constraints and Proposed Alternatives

- Discuss the desired alternative and have a cost/benefit analysis of property improvement investments and a no action alternative.
- If Forest Vegetation Simulation (FVS) or CRPTOS is executed, the generated results of the alternative selection should be appended to help document the alternative decision.

Silvics (Desired Forest Condition: Reforestation and Afforestation)

- Describe desired areas for regeneration practices with specifications for natural seedling recruitment, site preparation, planting and/or follow-up.
- Forest Stand Improvement
- Describe the area to be improved and the practice specifications for thinning and /or pruning.

Pests

- Problems and Protection from Pests
- Note known and/or potential insects, diseases, animals, weeds, and invasive species on property.
- Discuss prevention guidelines including how to inventory, control, and monitor infestations.
- Describe the range of integrated pest management tools, including mechanical, physical, biological, cultural or chemical management.

Fire Protection

- Discuss fire protection practices for mechanical, hand work, herbicide application and/or broadcast burning for stand/habitat improvement, fuel reduction and fire-wise safety.
- Describe and discuss local fire history, potential sources of fire ignition, fuel hazards, and infrastructure for protection including access and evacuation routes.
- Discuss the values of shaded fuel breaks, fuel breaks in strategic locations, and potential to connect with neighbors or a community effort.

Trespass concerns.

Wildlife

- Desired species habitat improvement:

Additional Objectives For:

Livestock:

Aesthetics:

Income:

Family Legacy:

Recreation:

Other:

FOREST MANAGEMENT UNIT INFORMATION:

Add as many pages of this section as there are management units designed for the ownership

For each forest management unit, write management objectives and a brief description of the management unit and its condition. Further detailed inventory/plot data can be included if desired. FVS or CRPTO forest modeling outputs can be appended to each unit description.

Name or Unit # _____ Acres _____

Location (describe and map id): _____

Objectives:

Describe type of silvicultural treatment including pre/post harvest activities and slash management.

Description:

Stand history, age and desired rotation cycle:

Tree species present, forest type and/or ecological site description (ESD):

Site index, soil type, elevation, slope:

DBH/size class, basal area, trees/acre, stocking, growth/yield potential:

Regeneration and stand improvement needs:

Riparian, meadows, aquatic habitat, stream and other watercourses:

Understory, downed woody debris, snags, wildlife habitat:

Erosion concerns, domestic uses and other conservation issues:

Unit Management Resource Concerns and Recommendations

PLANNED MANAGEMENT ACTIVITIES AND REQUIRED PERMITS

Management recommendations:

Include discussion of project specifications, priorities, feasibility and alternatives as well as a project map and a schedule of proposed activities covering at least five years. Identify which management unit/stand you are describing for your activities. If a subset of the stand is being treated, the area can be described and/or identified on a project map. Design an orderly timeline using the Management Activity and Tracking Form below.

If /once a conservation project is selected, the site specific environmental/cultural (CEQA/NEPA) documentation will need to be completed with the schedule of activities, project map and project specifications.

Harvest Documents:

Most commercial biomass removal activities need a CAL FIRE permit. Identify needed or current Cal Fire THP, NTMP and/or Categorical Exclusion for proposed management activities.

Identify other agency permits necessary for proposed activities related to harvesting activities.

Conservation Project Permits:

Identify a list of permits for which may be need for specific conservation practices.

Water Quality Best Management Practices or Agency Waiver

Note there may be permit requirements for dust control, water pickups, ponds, road maintenance, crossing replacements depending on property location in the State.

Monitoring

Discuss both proactive and required monitoring for regulatory compliance.

California Environmental Quality Act and National Environmental Protection Act information

Forest management activities including conservation practices may impact special environmental and/or cultural values. These values are often kept private for protection. Landowners need to know where they are and what they can do to protect them. When a project is proposed and a permit and/or government assistance is part of the project, environmental and cultural reviews by concerned agencies are necessary. Conservation projects using public incentives will require the following environmental and archaeological documentation and WILL BE ADDED AS AN ADDENDUM.

Environmental

- **Map the location of known geological, biological or ecological values sites. See Sections above.**
- **With any project a signed CAL FIRE CFIP Environmental Checklist (CEQA) or NRCS CPA-52 (NEPA). Checklist must be filled out by an RPF or certified planner.**

Archaeology

- **On a map note the location of known archeological, cultural, or historical sites and with it, attach existing record checks or surveys in a separate addendum entitled Confidential Archaeological Report.**
- **With any project, an Archaeological Report must be requested by an RPF or Archaeologist.**

ADDITIONAL PROFESSIONAL ASSISTANCE

Management Recommendations and Assistance for other lands or non-forested areas

List agencies and individuals that owner has or may consult for special sites, threatened and endangered species, desired species, livestock specialists, Native American cultural values, etc.

Community/Agency Cooperation Mechanisms

List agencies and NGOs such as the local office of CAL FIRE, NRCS, the local RCD, Fire-safe Council, and etc with current contact names and numbers the owner can contact for guidance and help.

PROPERTY AND PLAN MAPS

The map(s) shall contain the following elements as a minimum:

- On a recent USGS Topographical or GIS map include property and management unit boundaries at a scale of 4 inches = 1 mile (1 inch = 1320 feet minimum).
- Title, north arrow, scale, legend (including road layout, water resources, infrastructure identification, timber land, other land uses, unit boundaries, and etc as necessary to show activities).

Maps Required:

1. **Property Location Map:** Delineate property boundaries, access roads, nearest town or well known land mark.
2. **Parcel Map** including property boundaries, road layout, water resources, infrastructure identification,
3. **Management Unit map** showing location of forest type and management unit boundaries.
4. **Soil Types Map:** Show name and location of soil types present. Soil maps are available from NRCS Web Soil Survey: <http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm> , or from your local NRCS office.
5. **Water Resources Map:** Show name, location and classification of streams and other water resources.
6. **Road Assessment Map:** Show locations of roads and major skid trails. Indicate map points where projects such as road rehabilitation and culvert replacement are proposed
7. **Project Map:** Show location of proposed management activities
8. **Other maps:** As needed, other areas, including threatened and endangered species and archeological sites may be noted on a separate, confidential map.

Aerial Photos may be used in addition to the Main Management Plan Map.

Appendix 1

Selected Standards and Specifications

Appendix 2

Tax and Business Management

This section includes a series of statements related to tax and business management that should be included in plans.

Property tax – The forest management plan should document the current tax status of the property. Your state might have specific property tax programs that you may be eligible to participate in. Please be aware of the program rules and regulations.

Income tax – Include a statement that timber harvest and other revenue generating activities generally produce a federal and state income tax liability. Tax credits may be available for some management activities.

Estate tax – Include a statement that good estate planning can help to lessen tax liability when passing land to heirs and that landowners should seek good planning and tax advice.

Record keeping – Include a statement that good record keeping can help landowners manage their assets; increase their revenues; and minimize their tax liability.

Land Use – Document the land use classifications of the property from the county land use plan.

Appendix 3

Past Plans, Amendments and Updates

Appendix 4

Confidential Addendums

Appendix 5

**Supporting data and modeling outputs.

- E. PRUNING
- F. FOLLOW-UP
- G. RELEASE
- H. LAND CONSERVATION MEASURES
- I. FISH and WILDLIFE IMPROVEMENTS

Attach maps that refer to information included in the Management Plan as an Exhibit or Attachment at the back of the plan. Maps will include a USGS quadrangle map at a minimum scale of 4 inches = 1 mile that identifies the ownership as well as the location of proposed project, roads, water courses, and all other pertinent information that will help with property management issues.
