Assistant Specialist

Research Note No. 19

August 10, 1982

Announcement of Release

CRYPTOS

Cooperative Redwood Yield Project

Timber Output Simulator -- Interactive Program

Version 4.0

This notice formally releases the CRYPTOS model to the general public. CRYPTOS is a product of the Cooperative Redwood Yield Research Project and was written by Bruce Krumland and Lee C. Wensel. (© Wensel 1982). Supporting documentation for this program includes 21 Research Notes (list attached) and the PhD dissertation by Bruce Krumland. Further updated documentation may be released from time to time.

The CRYPTOS program has been distributed for testing to a number of private companies and to Humboldt State University. Copies of the final program, Version 4.0, may be obtained from these individuals or from me; the cost of such copies is limited to the cost of producing the copy. The authors specifically prohibit the sale of the program itself.

Earlier copies of the CRYPTOS model should not be distributed and modifications of Version 4.0 should contain comments detailing the modifications.

This work has been carried out under Ag. Expt. Station Research Project Numbers MS-2520 and 3815. Funding has come from various State and Federal sources as well as from private donations.
