RE: California Tree Mortality Taskforce - Local Identification of Tier 2 High Hazard Zones

Thank you for your recent submittal. Your request to designate the following watersheds for consideration as a local Tier 2 High Hazard Zone under Governor Edmund G. Brown's Emergency Proclamation, issued October 30, 2015 to address millions of dead and dying trees in California has been approved.

Watershed Name	Hydrologic Unit Code (HUC 12)	Date Submitted	Date Approved
Lower South Fork Tuolumne River	180400090702	5/03/2017	5/08/2017
Lower Middle Fork Tuolumne River	180400090602	5/03/2017	5/08/2017

This designation is effective as of the approved date(s) listed above. The Geographic Information System (GIS) data set will be updated on a quarterly basis (on or around January 1st, April 1st, July 1st and October 1st), at which time this designation will be added to the data layer. This approval letter as well as the updated GIS datasets (when available) will be posted to the CA Tree Mortality Taskforce Website under the "Maps and GIS Data" heading here:

<http://www.fire.ca.gov/treetaskforce/reports> .

Please feel free to contact me if you have any questions.

Sincerely,

KS
 Kevin Conway, Tree Mortality Task Force Manager
